VULCANO

2026

City or road: the choice is yours.

City or road: it's all the same. The Cecotec™ Vulcano range is designed to travel safely and with confidence on any road, delivering a noticeable response from the moment you twist the throttle. Its 6,000 W motor, with a peak power of up to 17,000 W, provides the surge you need to escape city traffic and keep pace when the open road beckons, reaching speeds of up to 120 km/h. There's no roar to be heard... but its electric heart will have you gripping the handlebars tightly.

Cecotec™ Vulcano Executive Series

17,000 W

Heart-stopping acceleration

The Vulcano Executive Series grants you true freedom to move without limits: its 6000 W motor and a peak power of 17,000 W deliver a powerful yet progressive response, allowing for confident acceleration in the city and impressive performance on the open road, reaching speeds of up to 120 km/h.

UP TO 200 KM OF RANGE¹

For the city and beyond

Whether for your daily commute or to escape the grind, its 72 V battery provides up to 200 km of range¹. Enough to traverse the entire city or venture out on a road trip.

ABS

Secure braking

Its ABS ensures more controlled and stable braking in demanding situations, enhancing your safety against unexpected events, whether in the city or on the open road.

SUSPENSION

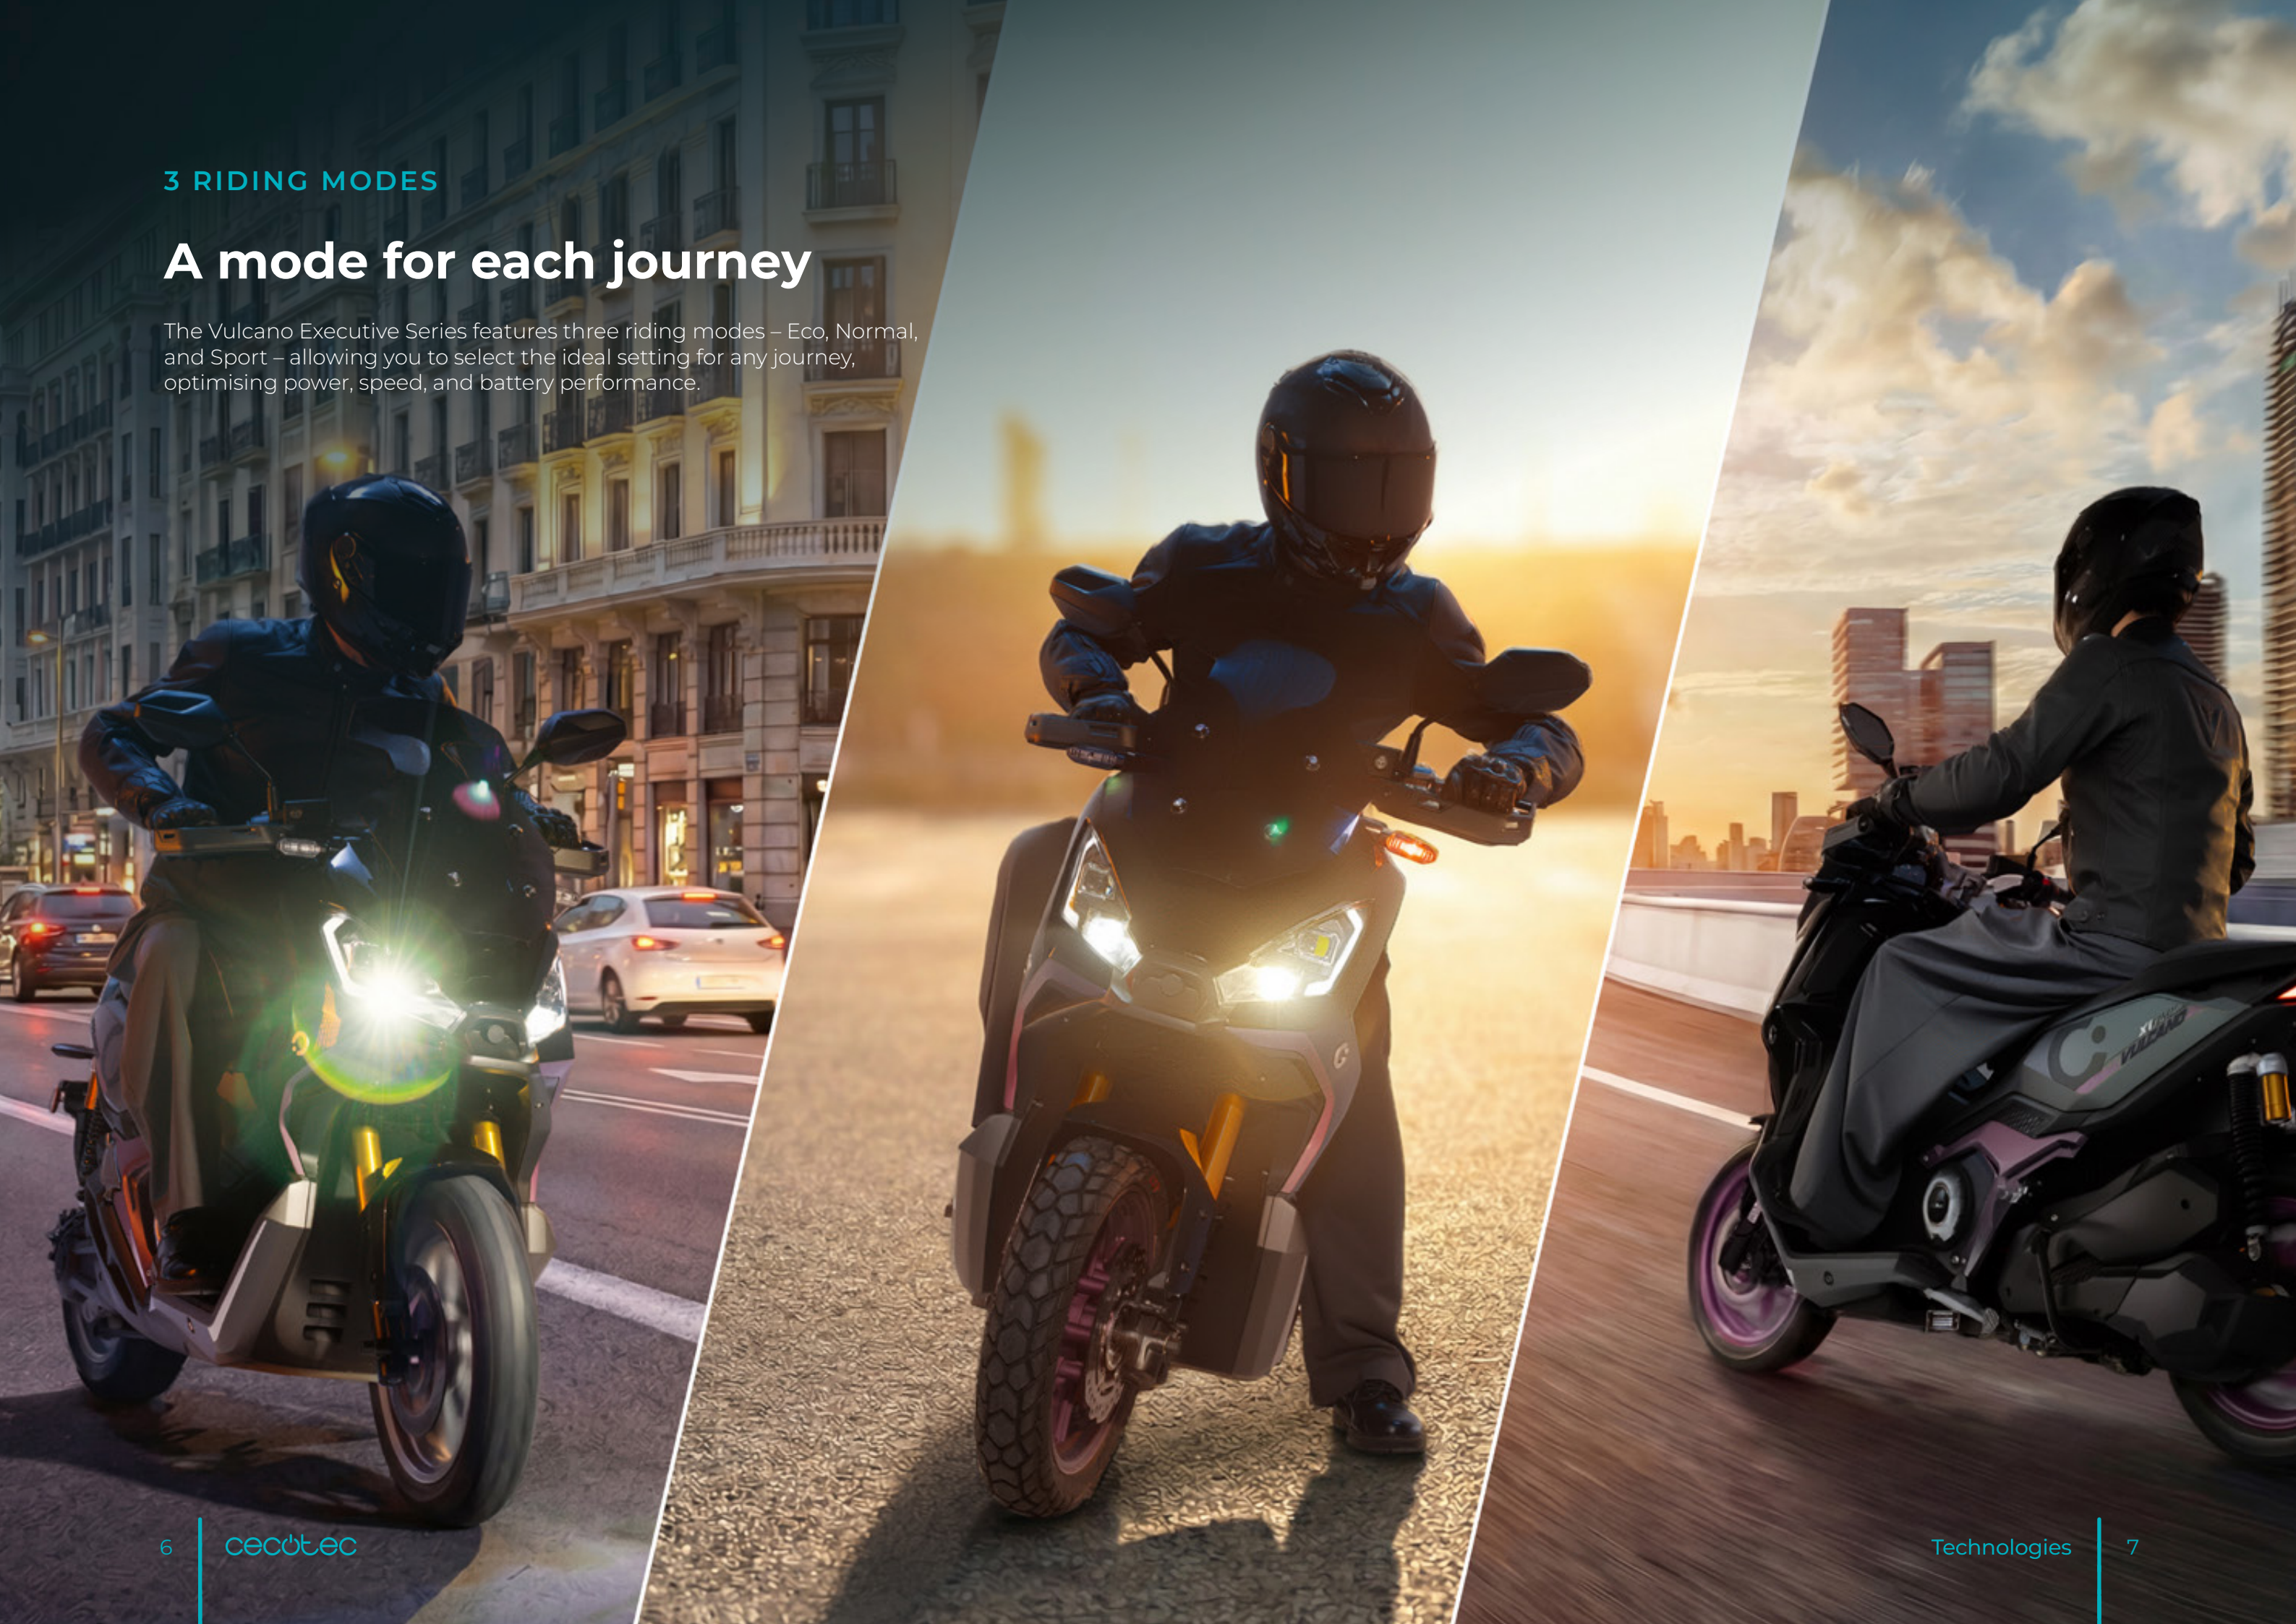

Absorbs every bump

Its hydraulic suspension and twin rear shock absorbers effectively cushion every road imperfection.

3 RIDING MODES

A mode for each journey

The Vulcano Executive Series features three riding modes – Eco, Normal, and Sport – allowing you to select the ideal setting for any journey, optimising power, speed, and battery performance.

TYPE 2 CHARGER

Range and freedom

Thanks to its universal Type 2 charger, your possibilities are limitless. You can recharge at most public stations and compatible charging points.

CONNECTED DISPLAY

Emotion and technology in perfect sync

The Vulcano Executive Series features a new-generation display with smartphone synchronisation, providing clear and intuitive access to key vehicle information.

Cecotec™ Vulcano

Enjoy every mile

Immediate acceleration, precise braking, smooth damping, great grip and stability. Our series of motorcycles has all the necessary equipment to offer the best riding experience on any journey, whether in the city or on the highway.

TYRES

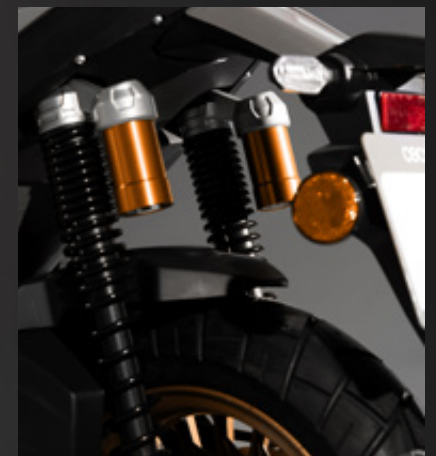

Great grip and stability

The design of its wheels (12", 13" and 14") improves driving performance, increases grip with the asphalt and provides more stability for the user to feel the road and enjoy a unique comfort.

BRAKES

Maximum safety

The motorcycles are equipped with hydraulic brakes or CBS to provide a fast, smooth and precise response when the brakes are activated, thus increasing safety in the event of unforeseen events and reducing risks.

SUSPENSION

Bump-proof

Comfort is taken to the next level thanks to the hydraulic suspension system, which absorbs shocks and vibrations caused by the terrain to make the ride so smooth it feels like the road is freshly paved.

Cecotec™ Vulcano S

Agility redefined

The Vulcano S is the most agile and urban model in the Vulcano range. An electric motorbike created for those seeking design, presence and performance on every journey. Its dynamic character allows you to move effortlessly through the city, embracing the pace of everyday life with more personality.

Vulcano S: A volcano in the city

6,000 W

Power to keep up your pace

Progressive power to get you around with confidence every day and reach speeds of up to 80 km/h when your route takes you onto interurban roads.

80 KM RANGE¹

Freedom for every day

Up to 80 km of range to explore the city and whatever else you set your mind to.

REMOVABLE BATTERIES

May the energy be with you

Remove the batteries and charge them conveniently anywhere using a standard household socket.

CBS AND CT BRAKES

Brake with confidence

CBS brakes and traction control for greater stability and safety on every city journey.

2 DRIVING MODES

You set the pace

Choose ECO to maximise range up to 50 km/h, or Sport to enjoy a more intense ride and reach 80 km/h.

LED AND FOG LIGHTS

See more. Be seen.

The LED lighting and integrated fog lights improve visibility in low-light conditions for safer riding.

Cecotec Vulcano (White/Red)

With a maximum power of 17000 W and up to 151 km of range. Available in two colours, it combines style, power and technology. L3eB (125cc equivalent)

FEATURES:

Unrivalled power for supreme riding: With a 6000 W motor and a maximum power output of 17000 W, the VULCANO redefines the standard for electric motorbikes, offering outstanding performance both in the city and on the road. Overcome any obstacle with impressive ease and feel the superiority in every ride.

Extended autonomy for the most demanding journeys: The high capacity lithium battery (72V 100Ah) provides a range of up to 140 km, allowing you to travel long distances without worrying about recharging. Perfect for those riders who need reliability and efficiency in their daily commute and long journeys.

Mixed wheels and maximum precision brakes: The 14" front and 13" rear wheels offer exceptional grip and stability, while CBS brakes ensure safe and efficient braking. Master any surface with confidence and security.

Maximum speed of 120 km/h: The VULCANO reaches speeds of up to 120 km/h, allowing you to make fast and efficient journeys both in the city and on the road. Get to your destination with speed and style like no other.

Strong and sporty design: With a bold design in two colours to be chosen, the VULCANO not only stands out for its performance, but also for its impressive appearance. This motorbike is a symbol of sophistication and power on the road.

Comfortable seat for two: Designed to comfortably carry one or two people, the VULCANO can carry a maximum load of 337 kg, making it perfect for any transport need without compromising on comfort.

Hydraulic suspension for carefree riding: The suspension system with inverted fork and twin rear gas shock absorbs road shocks and vibrations effectively, providing an extremely comfortable and enjoyable riding experience, even on the most challenging terrain.

State-of-the-art technology for maximum efficiency: The VULCANO incorporates advanced technology to optimise and control every aspect of your journey. From energy efficiency to comfort and safety, every detail has been carefully designed to offer an unrivalled riding experience using its TFT display.

Cecotec Vulcano Executive Series

With a maximum power output of 17,000 W and a range of up to 200 km, the Vulcano XT retains the performance of the original model whilst incorporating improvements in safety, performance, connectivity and comfort. Equipped with ABS brakes, a display with mobile syncing and a built-in Type 2 charger. L3eB-approved (equivalent to 125 cc).

FEATURES:

High-level electrical performance: Equipped with a 6000 W motor and a maximum power output of 17000 W, the Vulcano XT delivers a powerful and smooth response, ensuring solid performance both in town and on the open road.

Extended range for the most demanding journeys: The high-capacity 72 V 110 Ah battery provides a range of up to 200 km*, offering reliability and freedom for both daily commutes and longer journeys.

Disclaimer: *Maximum figures based on internal testing under ideal conditions with a 75 kg rider, at 60 km/h. and in ECO mode. Actual performance may vary depending on driving style, terrain, temperature and load.

Enhanced safety with ABS brakes: It features an ABS braking system that improves control and stability during heavy braking, providing added safety in the event of unforeseen circumstances on any type of road.

Maximum speed up to 125 km/h: Capable of reaching 125 km/h, this XT version maintains an optimal balance between power, efficiency and responsiveness for a smooth and efficient ride.

New Executive design with enhanced protection: It features a new, more sophisticated and contemporary look, incorporating a taller front fairing and hand guards that improve aerodynamic protection and comfort on long journeys.

Seating capacity and comfort for two passengers: Designed for two-person use, it has a maximum load capacity of 337 kg, allowing two people to be transported in complete comfort and stability.

Comfort-oriented hydraulic suspension: The suspension system, featuring an inverted fork and twin rear shock absorbers, effectively absorbs bumps in the road, ensuring a stable and comfortable ride.

Advanced display with mobile connectivity: Features a new-generation display with smartphone synchronisation, providing clear and intuitive access to key vehicle information.

Clean and safe riding: Complying with all traffic regulations, the Vulcano XT is a BEV (Battery Electric Vehicle) eligible for the "ZERO EMISSIONS" environmental badge.

Vulcano S Black electric motorbike

Urban electric motorcycle with maximum power of 6,000 W and range of up to 80 km. Fitted with a removable battery for easy recharging. Homologated as L3e, suitable for A1 or B license with over 3 years' experience. This adventure-style motorbike combines versatility, efficiency and style to help you get around with ease.

FEATURES:

Energy-efficient on every journey: Its motor perfectly balances a 3,000 W output for everyday use with peaks of 6,000 W maximum power when you need to unleash its full potential. A versatile motorbike, with optimised traction and the character needed to transform your daily commute into pure riding pleasure, whatever the terrain.

Smart battery life for your daily routine: Get about with complete freedom without constantly relying on the charger. Its battery is designed to fully cover your day-to-day city needs, offering 80 km of real-world range on a single charge. The efficient, hassle-free solution for those seeking maximum reliability on their daily journeys.

All-wheel drive and high-precision braking on any surface: The combination of its mixed-size wheels (14" front and 13" rear) ensures optimum grip on both tarmac and slippery surfaces. Its advanced CBS braking system, combined with traction control (TCS), works intelligently to prevent skidding and ensure balanced, safe and precise braking in any situation.

Optimal speed and urban pace: With a top speed of 80 km/h, this motorbike allows you to blend seamlessly into city traffic and on inter-city ring roads. Get around quickly, with control and that sophisticated style that transforms every journey into a smooth experience.

Adventure spirit in the city: A striking look with adventurous DNA. Its ADV-style design combines angular lines and a robust presence that certainly doesn't go unnoticed. A motorbike with a unique character, designed for those seeking a vehicle with its own personality, sophistication and the durability needed to conquer the daily grind of city streets.

Comfortable seat for two: Designed to comfortably carry one or two people, the Vulcano S can carry a maximum load of 289 kg, making it perfect for any transport need without compromising on comfort.

Hydraulic suspension for comfort on every journey: Fitted with a front hydraulic suspension system and twin rear shock absorbers, it precisely absorbs the bumps and potholes of city streets.
