AIR CIRCULATION
2025 RANGE

Everybody Fresh

Fans, air circulators, purifiers, coolers, air conditioners, among others. Discover the most advanced and complete range in ventilation, ideal for creating a refreshing environment that adapts to all types of homes and needs.

Index

Pedestal fans	4
Telescopic fans	50
Battery-powered pedestal fans	58
Pedestal air circulators	62
Air purifiers	68
Tower fans	78
Floor fans	114
Industrial fans	122
Desktop fans	136
Battery-powered desktop fans	152
Desktop air circulators	160
Wall-mounted fan	166
Ceiling fans	174
Mist fans	312
Desktop coolers	320
Air coolers	328
Portable air conditioners	342
Air conditioner couplings	368
Split air conditioners	376

Pedestal fans

DC motor.

Max. power: 70 W.

Max. diameter: 45 cm.

Speeds: 3 – 24.

Adjustable height.

Oscillation.

Timer.

Remote control.

EnergySilence 500 stand fan

16" stand fan with 40 W and 3 speeds, oscillating, silent, adjustable height, 5 blades, and maximum safety.

FEATURES:

Great power of 40 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

Its 16", equal to 40 cm, provide it with a great diameter which results in powerful air flows.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

The fan is fully adjustable with an adjustable telescopic rod from 110 to 130 cm to suit every user and situation. The air flow's angle of incidence can also be adjusted.

It has 5 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan main body

EnergySilence 515 MaxFlow White

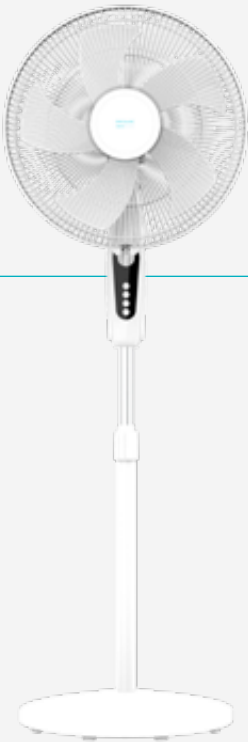

45-W and 16" pedestal fan with 3 speed settings, oscillation function and timer.

FEATURES:

45 W of power: facilitates the ventilation of the room in which the fan is located.
16 inches: they give it a large diameter that boosts the air outlet which, combined with its 5 blades and the safety grille, generates a correct ventilation process in the room, distributing the air more evenly.
3 speeds: allow you to regulate the intensity of the air flow according to what you need at any given moment.
Programmable timer up to a maximum of 1 hour, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Adjustable height: up to 135 cm, allowing you to select the height at which you want the fresh air to escape and adapt it to the needs of each moment.

COMPOSITION:

Fan, instruction manual

-  51 x 13.7 x 48 cm 5.1 kg
51 x 13.7 x 48 cm 5.1 kg
-  43 x 43 x 127.5 cm 4.29 kg
-  220-240V V 50Hz Hz
45 W
-  8435484082976 (Box)
18435484082973 (Master)
08297

EnergySilence 515 MaxFlow Black

45-W and 16" pedestal fan with 3 speed settings, oscillation function and timer.

FEATURES:

45 W of power: facilitates the ventilation of the room in which the fan is located.
16 inches: they give it a large diameter that boosts the air outlet which, combined with its 5 blades and the safety grille, generates a correct ventilation process in the room, distributing the air more evenly.
3 speeds: allow you to regulate the intensity of the air flow according to what you need at any given moment.
Programmable timer up to a maximum of 1 hour, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Adjustable height: up to 135 cm, allowing you to select the height at which you want the fresh air to escape and adapt it to the needs of each moment.

EnergySilence 520 Power stand fan

16" stand fan with 50 W and timer, 4 speeds, oscillating, silent, adjustable height, 5 blades, and maximum safety

FEATURES:

Great power of 50 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

The 16 inches of the fan, equivalent to 40 cm, give it a large diameter that enhances the airflow output along with its 5 blades.

Programmable timer up to a maximum of 2 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

The 4 speed options allow you to adjust the air flow intensity according to your needs and to the moment.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

Height and tilt adjustable from 110 to 130 cm for high airflow and in the desired direction.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan main body
Instruction manual

-  44.5 x 17.7 x 52 cm 6.2 kg
52 x 17.7 x 44.5 cm 6.2 kg

EnergySilence 560 Max Smart

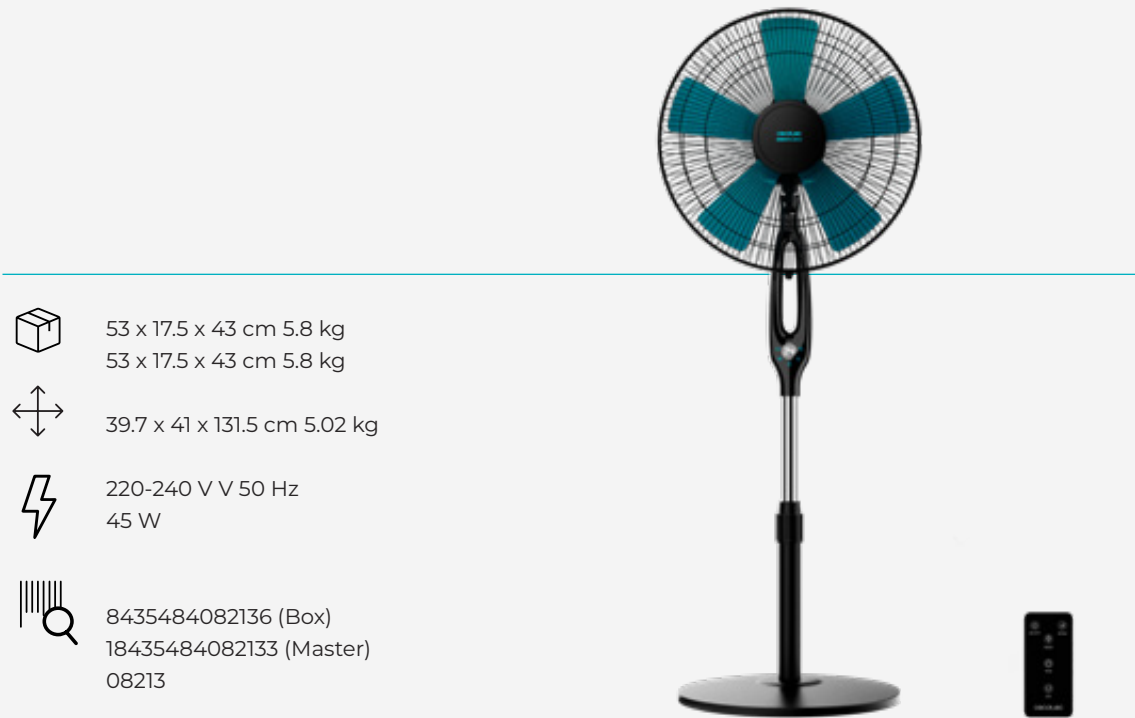

45-W and 16" pedestal fan with remote control, timer and LED display.

FEATURES:

45 W: high power motor that facilitates the ventilation of the room in which the fan is located.
16 inches: give it a large diameter that boosts airflow output.
It has 5 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
LED display and remote control to conveniently control all fan functions and see the selected settings.
Touch control to select fan operation easily and intuitively, and a display to see the settings.
3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
80° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control, remote control battery (CR2025)

-  53 x 17.5 x 43 cm 5.8 kg
53 x 17.5 x 43 cm 5.8 kg

08213

EnergySilence 530 Power Connected White stand fan

16" stand fan with 50 W and timer, 3 speeds, 3 modes, oscillating, silent, adjustable height, 5 blades, and maximum safety.

FEATURES:

Great power of 50 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.
The 16 inches of the fan, equivalent to 40 cm, give it a large diameter that enhances the airflow output along with its 5 blades.
Intelligent control thanks to its remote control and its panel with LED indicator, on which you can visualise the selected configuration.
It has 3 speeds and 3 modes (Normal, Nature, Sleep) that allow you to regulate the intensity of the air flow according to the needs of each moment.
Programmable timer up to a maximum of 7.5 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.
Height and tilt adjustable from 110 to 130 cm for high airflow and in the desired direction.

Remote control

EnergySilence 535 2in1 pedestal fan

40-W Stand and table fan, 3 speeds, oscillation, and adjustable height up to 115 cm.

FEATURES:

Great power of 40 W for a better room refreshment, instant and effective.

Its 16", equal to 40 cm, provide it with a great diameter that reinforces air flow. All this combined with its 5 blades allow an even air distribution during operation.

It is a 2-in-1 fan, it can be used as a stand or as a table fan. Useful for different situations.

The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.

75° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Pedestal fan main body
Table fan main body
Base
Instruction manual

EnergySilence 555 2in1 Smart XL Pedestal fan

Stand and desktop fan with 55 W, copper motor, remote control, 3 modes and 3 speed settings, 7-hour times and oscillation function.

FEATURES:

Great power of 55 W for a better room refreshment, instant and effective. Plus, its copper motor intensifies its power, effectiveness and durability.

Its 16", equal to 40 cm, provide it with a great diameter that reinforces air flow. All this combined with its 5 blades allow an even air distribution during operation.

It is a 2-in-1 fan, it can be used as pedestal or as desktop fan. Useful for different situations. It includes remote control for an easy usability of its functions, without having to control it directly from the fan.

The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.

The 3 fan modes, Normal, Nature and Sleep allow adjusting air flow and intensity to each moment and needs.

Programmable timer up to a maximum of 7 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

60° automatic oscillation for an optimum air distribution around the room.

EnergySilence 550 3in1

Multi-position pedestal fan with 3 heights: floor, desktop and wall, 16" with 60 W.

FEATURES:

3 in 1: in addition to being a pedestal fan, it can also be used as a desktop and wall-mounted fan, thus providing one appliance for three different needs.

60 W: its high power facilitates instant and efficient ventilation of the room in which the fan is placed.

Homogeneous distribution: the 16-inch fan has a large diameter that enhances the airflow output and, together with its 9 blades, assists in the ventilation process and allows for a more homogeneous air distribution.

The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.

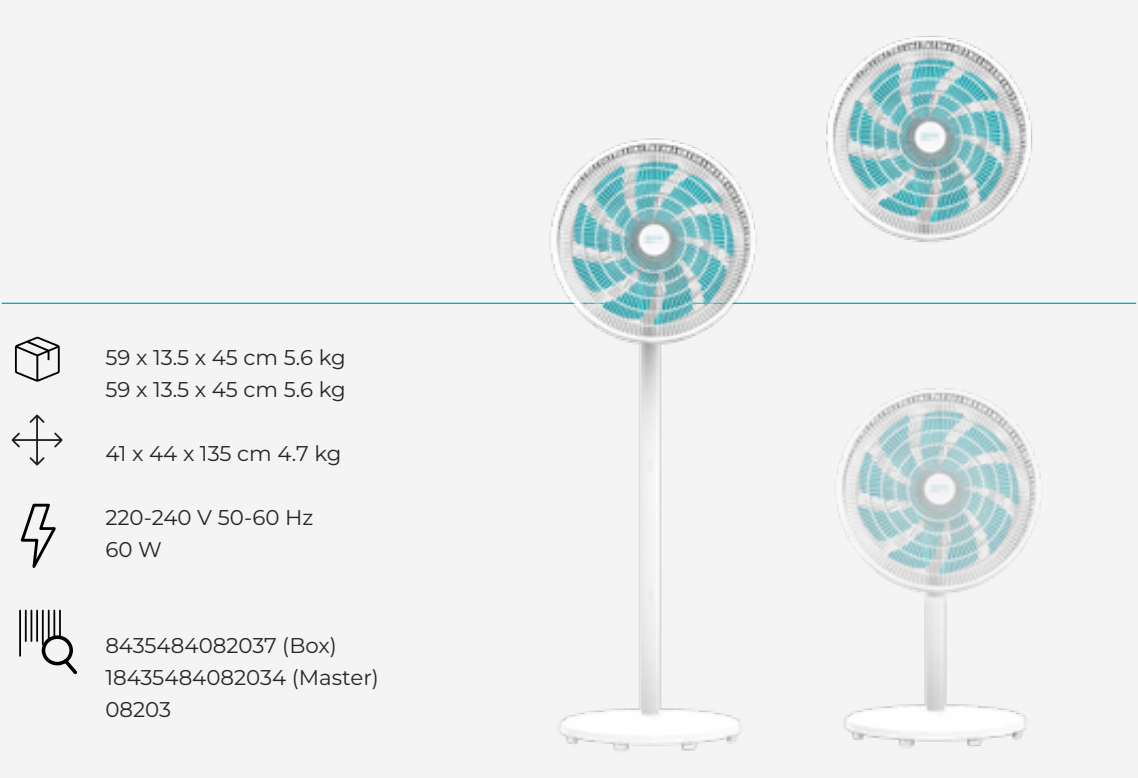

80° automatic oscillation for an optimum air distribution around the room.

Adjustable height: its maximum height of 135 cm is adjustable, allowing you to select the height at which you want the fresh air to come out and adapt it to your needs.

Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.

COMPOSITION:

EnergySilence 250 ClassicStyle Pink

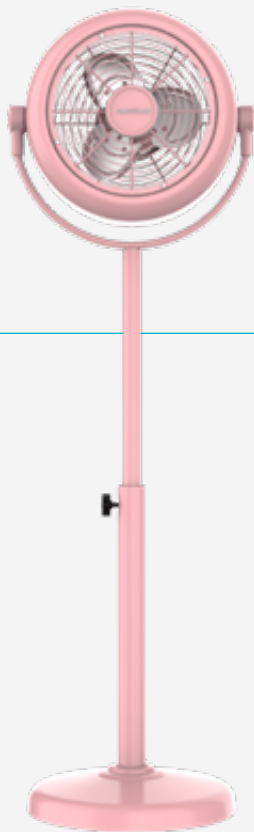

10" pink retro style pedestal fan with 25 W and adjustable tilt.

FEATURES:

25 W: high power motor that facilitates the ventilation of the room in which the fan is located.
10 inches: give it a large diameter that boosts airflow output.
It has 3 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
Adjustable tilt to achieve a large airflow in the desired direction.
2 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Elegant design: it will blend in perfectly with your home décor thanks to its sleek, minimalist design.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan, instruction manual

EnergySilence 250 ClassicStyle Beige

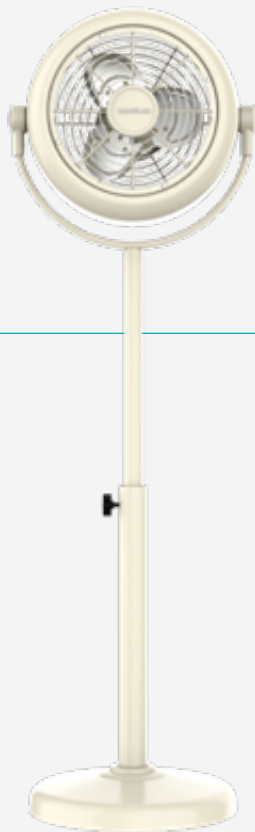

10" beige retro style pedestal fan with 25 W and adjustable tilt.

FEATURES:

25 W: high power motor that facilitates the ventilation of the room in which the fan is located.
10 inches: give it a large diameter that boosts airflow output.
It has 3 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
Adjustable tilt to achieve a large airflow in the desired direction.
2 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Elegant design: it will blend in perfectly with your home décor thanks to its sleek, minimalist design.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

EnergySilence 600 Woodstyle stand fan

Stand fan with 50 W and wood finish, 16 inches, 3 speeds, oscillation, silent, adjustable height, 4 blades and maximum safety.

FEATURES:

Great power of 50 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.
Its 16", equal to 40 cm, provide it with a great diameter which results in powerful air flows.
It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.
The fan is fully adjustable with a telescopic bar adjustable in height from 90 to 125 cm to suit every user and situation. The air flow's angle of incidence can also be adjusted.
It has 4 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

EnergySilence 600 MaxFlow stand fan

18" stand fan (45 cm) with 6 blades, 60 W, copper motor and 3 speeds. 75° oscillation and adjustable height up to 20 cm. Great stability.

FEATURES:

Great power of 70 W for a better room refreshment, instant and effective.
Its 18", equal to 45 cm, provide it with a great diameter which results in powerful air flows.
It features 6 blades, which improve the even distribution of air during operation.
Copper motor which provides it with great quality, durability and power.
The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.
75° automatic oscillation for an optimum air distribution around the room.
Its adjustable height of up to 20 cm (120 to 140 cm) allows you to select the height at which you want the fresh air to escape and adapt it to the needs of the moment.
It is extremely stable thanks to its robust 43-cm base.

COMPOSITION:

Instruction manual

EnergySilence 610 Max Flow

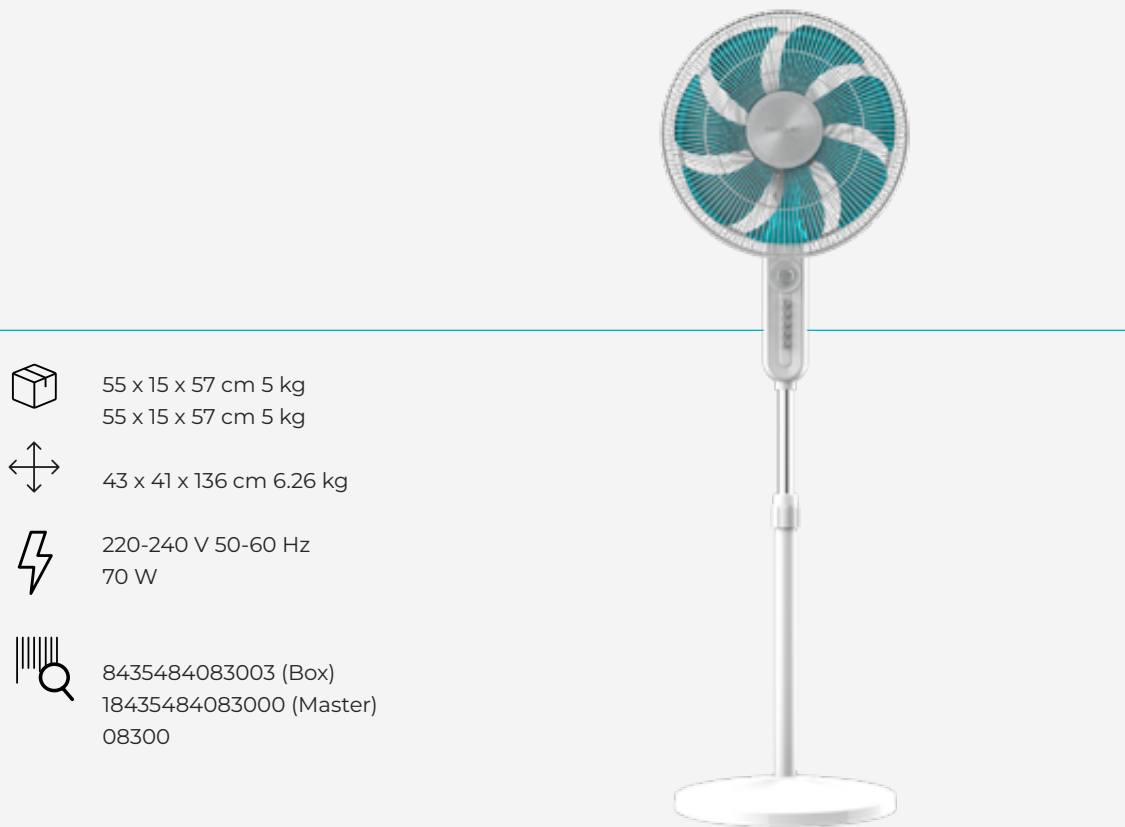

70-W and 16" pedestal fan with timer, oscillation function and adjustable height.

FEATURES:

70 W: high power motor that facilitates the ventilation of the room in which the fan is located.
16 inches: give it a large diameter that boosts airflow output.
4 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 2 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
90° automatic oscillation for an optimum fresh air distribution around the room.
Adjustable tilt to achieve a large airflow in the desired direction.
It has 7 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
Adjustable height up to 130 cm for high airflow and in the desired direction.

COMPOSITION:

Fan, instruction manual

EnergySilence 610 MaxFlow Control stand fan

18" stand fan (45 cm) with 6 blades, 60 W, copper motor and 3 speeds. 75° oscillation and adjustable height up to 20 cm. Timer, remote control and function LED indicator. Great stability.

FEATURES:

Great power of 70 W for a better room refreshment, instant and effective. Its 18", equal to 45 cm, provide it with a great diameter that reinforces air flow. All this combined with its 6 blades allow an even air distribution during operation. It includes remote control for an easy usability of its functions, without having to control it directly from the fan. Copper motor which provides it with great quality, durability and power. The fan has a panel, in which the function operating or set is displayed. Programmable timer up to a maximum of 7.5 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off. The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment. The 3 fan modes, Normal, Nature and Sleep allow adjusting air flow and intensity to each moment and needs. 75° automatic oscillation for an optimum air distribution around the room. Its adjustable height of up to 20 cm (120 to 140 cm) allows you to select the height at which you want the fresh air to escape and adapt it to the needs of the moment. It is extremely stable thanks to its robust 43-cm base.

EnergySilence 620 Flow Control

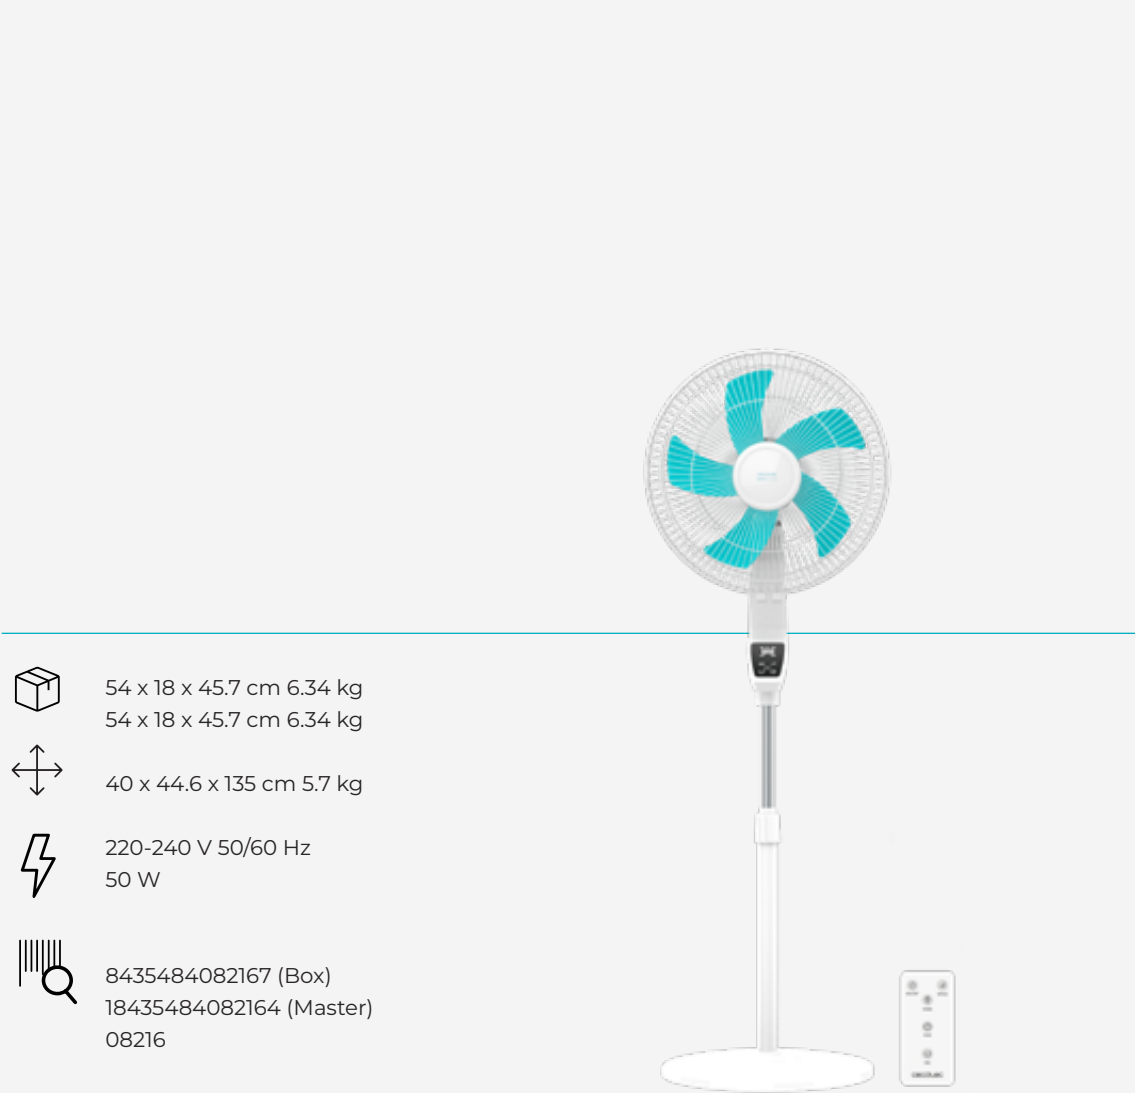

16" pedestal fan with 50 W, timer, remote control and touch control.

FEATURES:

50 W: high power motor that facilitates the ventilation of the room in which the fan is located. 16 inches: give it a large diameter that boosts airflow output. Touch control and LED display: includes a touch panel that allows you to control all its functions with a simple touch as well as see all the settings on its display. Remote control: select functions easily. 3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment. 2 modes: choose between Nature and Sleep mode, which adapt to every moment. Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off. Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

COMPOSITION:

Fan, instruction manual, remote control, battery (AAA, not included)

-  54 x 18 x 45.7 cm 6.34 kg
54 x 18 x 45.7 cm 6.34 kg
-  40 x 44.6 x 135 cm 5.7 kg
-  220-240 V 50/60 Hz

EnergySilence 620 MaxFlow

Smart stand fan

18" stand fan (45 cm) with 6 blades, 60 W, copper motor and 3 speeds. 75° oscillation and adjustable height up to 20 cm. Timer, remote control and LED display. Great stability.

FEATURES:

Great power of 70 W for a better room refreshment, instant and effective.
Its 18", equal to 45 cm, provide it with a great diameter that reinforces air flow. All this combined with its 6 blades allow an even air distribution during operation.
It includes remote control for an easy usability of its functions, without having to control it directly from the fan.
The fan's LED display allows viewing the selected settings, on the fan itself or on the remote control.
Copper motor which provides it with great quality, durability and power.
Programmable timer up to a maximum of 7.5 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.
The 3 fan modes, Normal, Nature and Sleep allow adjusting air flow and intensity to each moment and needs.
75° automatic oscillation for an optimum air distribution around the room.
Its adjustable height of up to 20 cm (120 to 140 cm) allows you to select the height at which you want the fresh air to escape and adapt it to the needs of the moment.
It is extremely stable thanks to its robust 43-cm base.

Energysilence 1000 Smart Control

25-W and 16" pedestal fan with DC motor, timer, remote control, touch control, display and oscillation function.

FEATURES:

25 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
16 inches: large diameter that enhances airflow.
9 aerodynamic blades: designed to maximise airflow and ensure a constant flow of fresh air.
Remote control: convenient and intuitive control thanks to its remote control and LED display that shows the configuration in use.
Touch control: select the ideal settings for every moment with a single touch.
8 speeds: regulate the intensity of the air flow according to the needs of each moment.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
70° automatic oscillation for an optimum fresh air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control, remote control battery (CR2025)

-  49 x 16.5 x 52.5 cm 4.5 kg
49 x 16.5 x 52.5 cm 4.5 kg
-  40 x 40 x 129 cm 3.55 kg

EnergySilence 1010 Extremeflow stand fan

16" stand fan with 60W and timer, 3 speeds, oscillation, silent, adjustable height, 10 blades, and maximum safety.

FEATURES:

Great power of 60 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

The 16 inches of the fan, equivalent to 40 cm, give it a large diameter that enhances the airflow output along with its 10 blades.

Programmable timer up to a maximum of 2 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located. It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

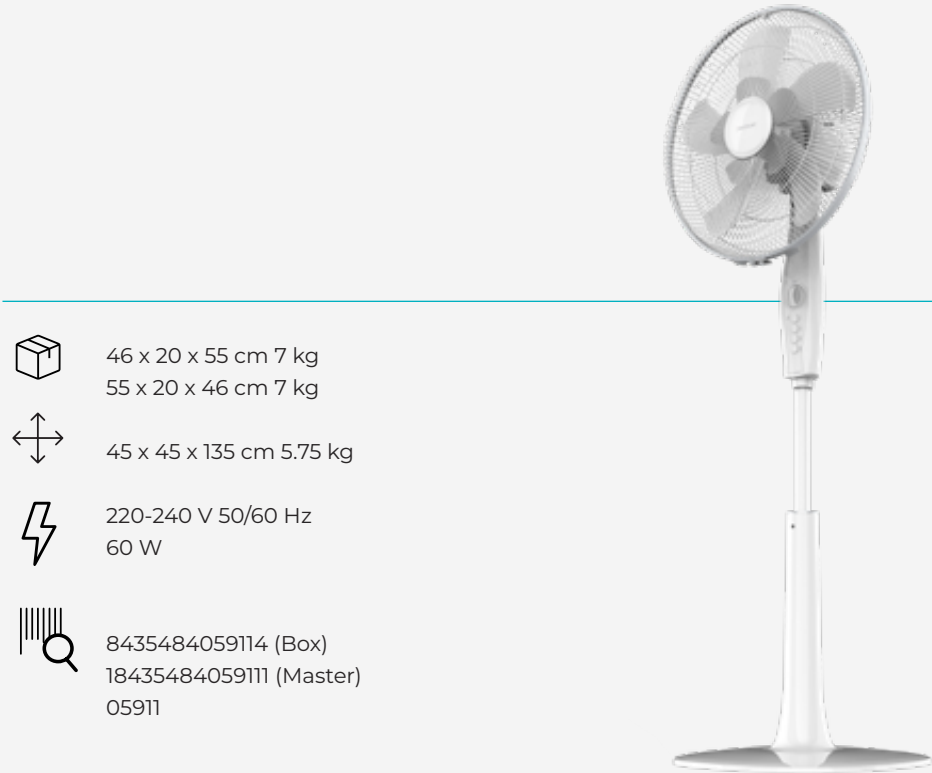

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

Adjustable height and tilt from 115 to 135 cm for high airflow and in the desired direction.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan main body
Instruction manual

EnergySilence 1010 Extreme

Connected stand fan

16" stand fan with 60 W copper motor and timer, 6 speeds, 3 modes, remote control, LED display, oscillation, silent, adjustable height, 10 blade, and maximum safety.

FEATURES:

Great power of 60 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

The 16 inches of the fan, equivalent to 40 cm, give it a large diameter that enhances the airflow output along with its 10 blades.

Intelligent control thanks to its remote control and LED display, on which you will be able to visualize the selected configuration.

It has 6 speeds and 3 modes (Eco, Sleep and Turbo) that allow regulating the intensity of the air flow according to the needs of each moment.

Programmable timer up to a maximum of 15 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

EnergySilence 1030 Smartextreme stand fan

16" stand fan with 28 W and DC motor, 24 speeds, 3 modes, oscillation, silent, height adjustable, 10 blades, and maximum safety

FEATURES:

DC motor with 28 W which enables ventilation of the room as it provides the fan with great quality, efficiency and durability, as well as collaborating in its ventilation process in a silent way and reducing energy consumption.

The 16 inches of the fan, equivalent to 40 cm, give it a large diameter that enhances the airflow output along with its 10 blades.

It has 24 speeds and 3 modes (Eco, Sleep and Turbo) that allow regulating the intensity of the air flow according to the needs of each moment.

Intelligent control thanks to its remote control and LED display, on which you will be able to visualize the selected configuration.

Programmable timer up to a maximum of 18 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

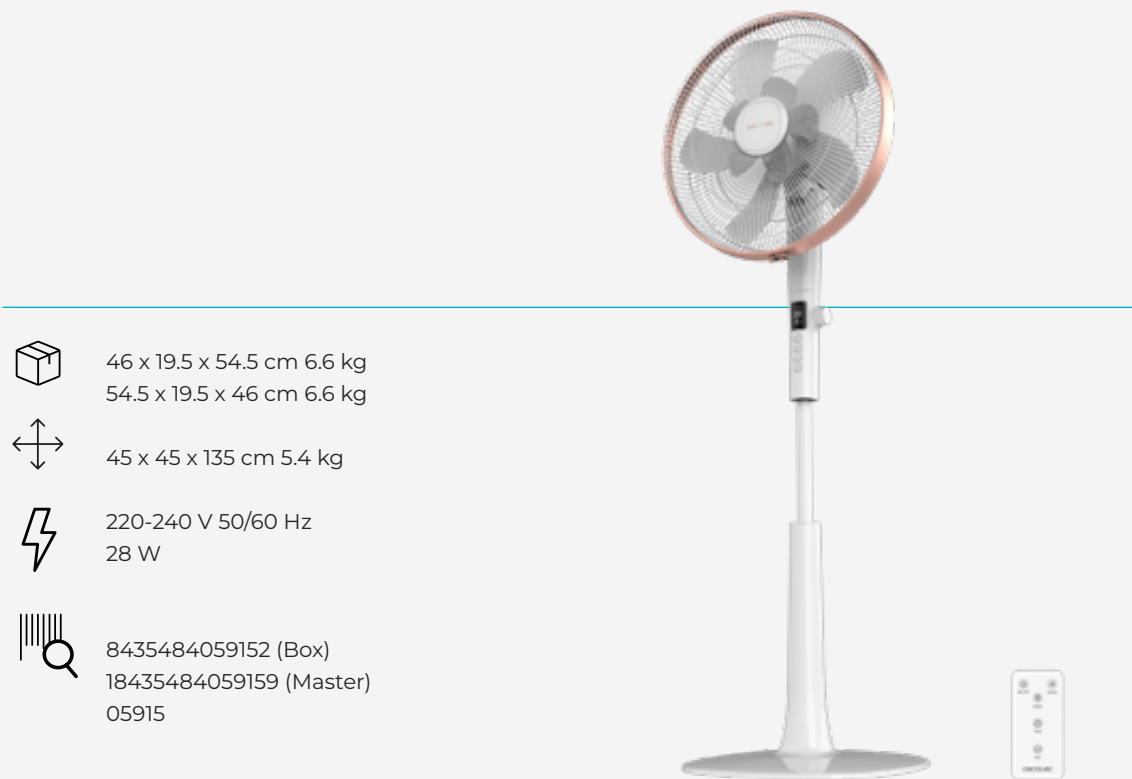

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

Adjustable height and tilt from 115 to 135 cm for high airflow and in the desired direction.

EnergySilence 1600 Moskito

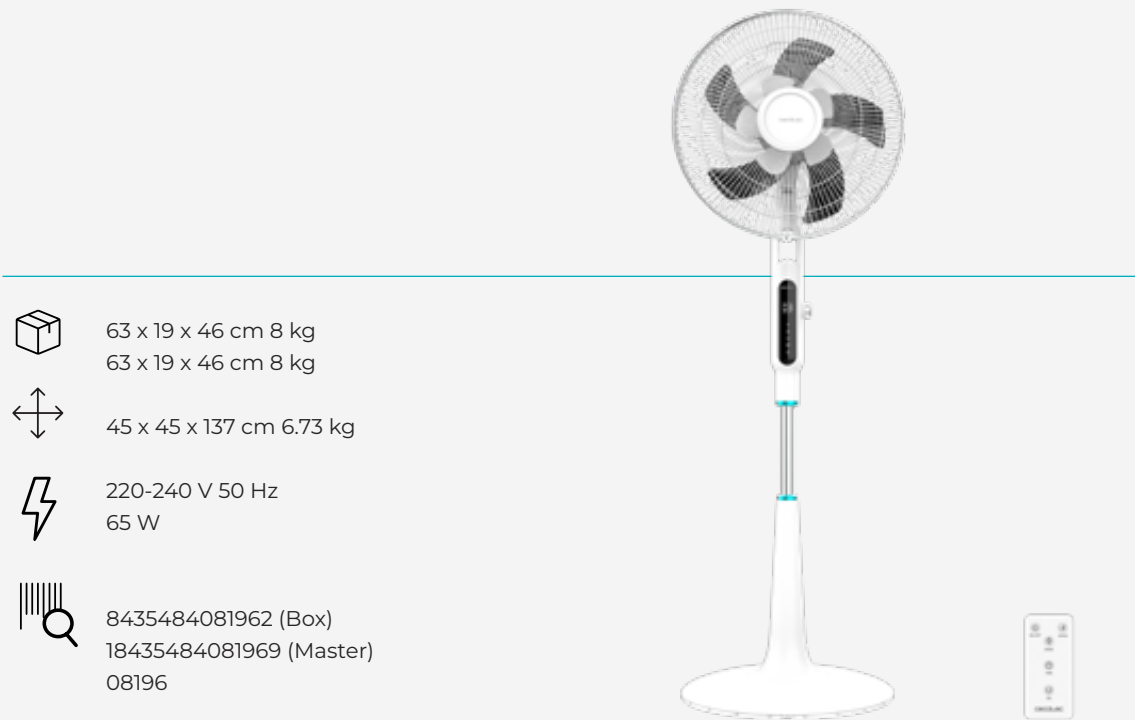

Pedestal fan with mosquito repellent function, 65 W, timer, touch control and remote control.

FEATURES:

Mosquito protection: mosquito protection function thanks to the combination of the fan and the mosquito repellent tablets.
65 W of power: facilitates the ventilation of the room in which the fan is placed.
Total control thanks to its remote control and touch panel with LED display on which you can see the selected settings.
10 speeds and 3 modes: they allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
16 inches: they give it a large diameter that boosts the airflow output which, together with its 5 outer and 5 inner blades, collaborate throughout the ventilation process and allow a more homogeneous distribution of the air.
Adjustable height and tilt from 118 to 135 cm for high airflow and in the desired direction.

COMPOSITION:

Fan, instruction manual, remote control, remote control battery (CR2025)

- 63 x 19 x 46 cm 8 kg

EnergySilence 1200 Woody tripod fan

Wooden tripod fan with 3 12-inch blades and a total diameter of 30 cm. 80-W copper motor capable of operating at 3 different speeds. Height adjustable from 115 to 130 centimeters and inclination of up to 80 degrees. Elegant design.

FEATURES:

Very powerful fan, with 80 W to instantly heat the room where it is located.
100 % copper motor which provides it with great quality, durability and power.
The fan has 3 blades designed with perfect aerodynamics, for excellent air distribution during ventilation.
Its diameter of 12" (30 cm) result in great fresh air flows and perfect ventilation.
The fan offers 3 different fan speeds, to adapt power and air flow to each moment's needs.
Height adjustable from 115 to 130 centimetres, it allows you to select the air outlet depending on the season where we are, whether it is the living room, the dining room or the bedroom.
80° tilt for a total air direction control.
Its elegant wooden tripod allows placing the fan in any room, even as a decorative element.

COMPOSITION:

Fan main body

EnergySilence 1600 Woody Smart tripod fan

Wooden tripod fan with 4 16-inch blades and a total diameter of 40 cm. Remote control and timer. Elegant design.

FEATURES:

Very powerful fan, with 50 W to instantly heat the room where it is located.
100 % copper motor which provides it with great quality, durability and power.
It includes remote control for an easy usability of its functions, without having to control it directly from the fan.
The fan has 4 blades with a diameter of 16" (40 cm) designed with perfect aerodynamics, for excellent air distribution during ventilation.
The fan offers 3 different fan speeds, to adapt power and air flow to each moment's needs.
Programmable timer up to a maximum of 7.5 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Adjustable height from 130 to 155 centimeters that allows you to select the air outlet depending on the room where you are, whether it is the living room, dining room or bedroom.
80° oscillation for a total air direction control.
Its elegant wooden tripod allows placing the fan in any room, even as a decorative element.

EnergySilence FanLamp

Pedestal fan with LED light ring with DC motor and reversible air outlet, 36 W power, touch control and remote control, three selectable heights.

FEATURES:

It has an inner LED light ring. It also has three shades to choose from so that you can select the one that best suits your needs and those of your home.
36 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
Reversible air outlet to select whether you prefer an upper or lower air outlet.
360° swivel capability: with its 360 degree manual swivel capability you can adjust the air direction easily and precisely, creating a cool and comfortable environment in every corner
Touch mode: allows you to select the mode you want in a simple and practical way.
Thanks to its display, you can see which mode your fan is in and change its operation with its remote control.
Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off. In addition, you can select from 9 speeds to adjust the airflow to your liking.
Adjustable height in three different positions, up to a height of 160 cm.

EnergySilence 800 FoldAir Portable

Foldable portable fan, 7200 mAh.

FEATURES:

Foldable and telescopic: the fan stands out for its unique ability to fold and adapt to various heights. Experience versatility in cooling with our expandable option, designed to fit your needs and space with ease.

Use your fan wirelessly for a long time thanks to its 7200 mAh battery that offers great autonomy.

8 inches: give it a large diameter that boosts airflow output.

5 aerodynamic blades ensure maximum fresh air flow in the most efficient way.

3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.

Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.

COMPOSITION:

Battery-powered pedestal fans

BLDC motor.

Power: 22 W.

Autonomy: 34 h max.

Diameter: 33 cm.

Adjustable height.

Oscillation: vertical and horizontal.

Timer.

Remote control.

EnergySilence 2600 Sunflower Portable Battery-powered fan

3-in-1 battery fan, 22 W with BLDC motor, 13" diameter, long runtime thanks to its 2600 mAh battery, LED display, remote control, touch control, and horizontal and vertical oscillation.

FEATURES:

Great power of 22 W for better, instant, and efficient ventilation of the room the fan is located in. In addition, the BLDC motor increases power, and efficiency, durability, as well as being ultra-quiet.

The fan's 13 inches, equivalent to 33 cm, give it a large diameter that boosts the airflow output, which, together with its 10 outer and 6 inner blades, collaborate throughout the ventilation process and allow for a more homogeneous air distribution.

It's a 3-in-1 fan, i.e., in addition to being a pedestal fan, it can also be used as a half-height fan and as a table fan. That makes the product useful for different needs. In addition, it is foldable so it can be easily stored inside its own base, this way saving space.

It features a touch panel that allows you to control all its functions with a simple touch, as well as a remote for a much more comfortable control without physically approaching the fan. In addition, the remote control is magnetised so that it can be attached to the centre of the fan and is always within easy reach.

The 12 speeds allow to adjust the airflow intensity according to need, while its 2 ventilation modes Nature and Sleep allow to always adapt the flow and intensity of air.

Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

Automatic horizontal oscillation of 30°, 60°, 90°, and 120° and vertical oscillation of 30°, 60°, and 90° to facilitate fresh-air distribution throughout the room.

2600 mAh Li-ion battery for an increased, cordless runtime. Fully portable.

LED display showing battery level, speed, timer, and selected oscillation degree.

It includes a back light to light up the room where the independently operating fan is located.

EnergySilence 900 Cyclone

35-W and 9" pedestal fan with oscillation function.

FEATURES:

35 W: high power motor that facilitates the ventilation of the room in which the fan is located.
9 inches: give it a large diameter that boosts airflow output.
3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Adjustable tilt: achieve a large airflow in the desired direction.

EnergySilence 1000 Cyclone Smart

60-W and 9" pedestal fan with timer, remote control, oscillation function and touch control.

FEATURES:

60 W: high power motor that facilitates the ventilation of the room in which the fan is located.
9 inches: give it a large diameter that boosts airflow output.
3 speeds and 3 modes: choose between Normal, Natural and Sleep modes and regulate the intensity of the air flow according to your needs.
Programmable timer up to a maximum of 7 hours, which enables you to set the desired operating time.
Touch control: get more comfort when selecting the fan settings with the touch panel or operate it also via the remote control.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Adjustable tilt to achieve a large airflow in the desired direction.

TotalPure 2in1 MoonStyle fan and air purifier

2 in 1: bladeless fan and air purifier with DC motor and Wi-Fi control. With LED display, 9 speeds, 4 modes, remote control, touch control, and timer up to 8 hours.

FEATURES:

The fan is designed with a DC motor and 35 W of power to cool and purify the air in your home quickly and efficiently.
Enjoy quality air thanks to its filter that retains the particles which pollute the air in your home to give you a breath of fresh air.
Wi-Fi control via smartphone, touch control and remote control.
Its advanced bladeless system offers high performance and quiet operation. In addition, the bladeless technology helps to distribute the air throughout the room.
It creates a customised ambience with a single touch from your mobile phone or remote control. Enjoy fresh, clean air in the most comfortable way.
Control the fan with a simple touch and quickly view the air quality and selected settings on the LED display.
The fan distributes the air throughout the room with its automatic oscillation of 30-60-90-120° to cool every corner of the room where you place it.
It regulates the intensity of the air flow according to the needs of each moment with its 9 speeds, 4 modes. Forget about worries thanks to its programmable timer for up to 8 hours.

TotalPure 3in1 Vision fan, heater and air purifier

3 in 1: Fan, heater and air purifier.

FEATURES:

This 3 in 1 has a great heating capacity due to its 2000 W, and is capable of heating rooms very efficiently.
Thanks to its powerful fan, 45 W, it is also capable of cooling rooms very efficiently.
It features an "Air Purifier" function, which removes hazardous particles in air with its high-efficiency filter.
It offers smart control thanks to its LED display and remote control, which allow for a more simple and easy use of this 3 in 1 device.
Its DC motor and Bladeless technology ensure optimum operation of the device, and the best performance during heating, air purifying and fan function. Effective and silent.
The 80° oscillation function aids the fan and heating operation as it widens the device's coverage area.
It features a 8-hour timer, which allows setting the desired operating time. The LED display will show the selected settings.
There a 14 speed settings in total. 9 speed settings under the Fan mode (1-Sleep, 9-Turbo), 4 speed settings under the Heating mode (Eco, Low, Medium and High), and a last Silent fan function. This function has its own remote control button.
3 preset modes: Sleep mode (minimum speed), Turbo mode (maximum speed) and Silent mode.
Its LED display is located on its side touch control panel, and can be used to turn the device on and off, as to select Fan or Heating mode.
Its thermostat allows the product to detect the room temperature, and selecting the desired temperature within a range of 1 °C to 30 °C (only heating mode).
Elegant design which makes this 3 in 1 perfectly suitable for any room at home, for you to enjoy a warm or cool environment, always with the cleanest air.

EnergySilence 690 Skyline

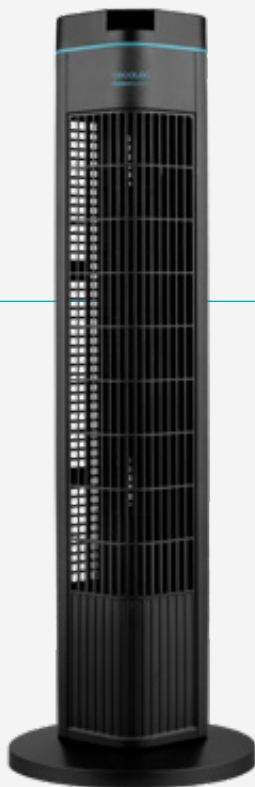

50-W and 29" tower fan with timer and oscillation function.

FEATURES:

50 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
29 inches in height: allows to provide a large airflow to intensify the ventilation process.
3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
3 modes: choose between Normal, Nature and Sleep mode to suit every moment.
Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
90° automatic oscillation for an optimum fresh air distribution around the room.

COMPOSITION:

Fan, instruction manual

EnergySilence 790 Skyline tower fan

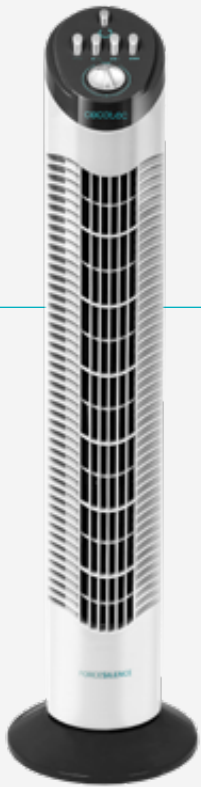

50 W mechanical tower fan, 3 speeds.

FEATURES:

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.
3Speed Function: choose from its 3 operating speeds (low-Night, medium-Eco and high-Turbo) in order to adjust the air flow intensity to your needs.
Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.
CoolTimer: it includes a programmable timer that can be scheduled up to 120 minutes, time after which the fan turns automatically off for maximum comfort and to save energy.
Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Elegant Design: Well-cared design with elegant lines that adapt to your home's decoration. It is also light to improve its transportation and storage.
Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.
EasytoMove: Easy to transport and to store thanks to its handle.

EnergySilence 790 Skyline Control

32" tower fan with 45 W and 3 speeds, timer, oscillation, easy to use, handle and maximum safety.

FEATURES:

45 W: high motor power for instant and efficient ventilation of the room in which the fan is placed.
32 inch: large fan height, which allows a large airflow to intensify the ventilation process. The remote control allows you to control all its functions comfortably without having to get close to the fan.
Programmable timer up to a maximum of 3 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
70° automatic oscillation for an optimum air distribution around the room.
3 speeds: choose between Low, Medium and High speeds, which allow you to regulate the intensity of the air flow according to your needs at any given moment.
It includes a comfortable rear handle that allows you to easily move it from one room to another.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

EnergySilence 790 Skyline Smart

45-W and 30" tower fan with remote control, LED display, 3 speed settings, 3 modes, oscillation function and timer.

FEATURES:

High power of 45 W: improves the ventilation of the room in which the fan is placed instantly and effectively.
38 inches high: facilitates the fresh air distribution process due to its wide air outlet grille.
Control it easily: thanks to the remote control you can conveniently control all the fan's functions and, thanks to the LED display, you can see the selected functions.
Touch control to select the fan operation and display to see the selected settings.
Regulate the intensity: it has 3 speeds and 3 operating modes that allow you to regulate the intensity of the air flow according to the needs of each moment.
70° automatic oscillation for an optimum fresh air distribution around the room.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

EnergySilence 850 SkyLine tower fan

Tower fan, 45 W and 33".

FEATURES:

Great power of 45 W for a better room refreshment, instant and effective.
Copper motor that provides it with a great quality, efficiency, durability and power.
Its 33" height (84 cm) allows for a great air flow and intensifies the cooling process.
The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.
70° automatic oscillation for an optimum air distribution around the room.
Programmable timer up to a maximum of 2 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
It includes a comfortable rear handle that allows you to easily move it from one room to another.
Its simple usability allows for an easy use of the device, fast and intuitively.

EnergySilence 800 Skyline Smart

60-W and 36" tower fan with touch and remote control, timer and digital display.

FEATURES:

36 inches: great height that facilitates the fresh air distribution process due to its wide air outlet grille.
60 W: high motor power that improves the ventilation of the room in which the fan is placed instantly and efficiently.
LED display and remote control to conveniently control all fan functions and see the selected settings.
Touch control to select fan operation easily and intuitively, and a display to see the settings.
3 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
60° automatic oscillation for an optimum air distribution around the room.
It includes a comfortable rear handle that allows you to easily move it from one room to another.

COMPOSITION:

Fan, instruction manual, remote control, remote control battery (CR2025)

-  94.5 x 18.5 x 17.5 cm 2 kg
94.5 x 18.5 x 17.5 cm 2 kg
-  27 x 27 x 90 cm 2.8 kg

EnergySilence 890 Skyline tower fan

50 W digital tower fan, 3 speeds.

FEATURES:

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.
Smart Control: Smart control thanks to its remote control and its LCD display. Intuitive and easy to use.
Total Control 3: The fan includes 3 air modes:
BREEZE mode: enjoy maximum freshness without giving up silence.
Eco mode: Keep your home cool and cut back on your electricity bill.
SLEEP mode: Created for you to enjoy relaxing rests and nights.
Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.
3Speed Function: Choose between its 3 operating speeds in order to adjust air flow intensity to your needs.
CoolTimer: It includes a programmable timer that can be scheduled up to 7.5 hours, time after which the fan turns automatically off for maximum comfort and to save energy.
Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Elegant Design: Well-cared design with elegant lines that adapt to your home, adjustable and light to move and store it.
Health&Safety: The fan complies with environmental safety and protection current legislation.
EasytoMove: Easy to transport and to store thanks to its handle.

EnergySilence 1090 Skyline Retro Smart Green

32" tower fan with 40 W, LED display, touch and remote control, 12 hour timer and oscillation function.

FEATURES:

- 40 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
- 32 inch: improves the fresh air distribution process due to its wide air outlet grille.
- Remote control included: control all its functions remotely.
- LED display to check the selected settings as well as the room temperature.
- Touch control panel, user-friendly.
- 3 speeds and 3 modes: regulate the intensity of the air flow according to the needs of each moment.
- Programme the fan for up to 12 hours using its timer.
- 72° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control

EnergySilence 1090 Skyline Retro Smart White

32" tower fan with 40 W, LED display, touch and remote control, 12 hour timer and oscillation function.

FEATURES:

- 40 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
- 32 inch: improves the fresh air distribution process due to its wide air outlet grille.
- Remote control included: control all its functions remotely.
- LED display to check the selected settings as well as the room temperature.
- Touch control panel, user-friendly.
- 3 speeds and 3 modes: regulate the intensity of the air flow according to the needs of each moment.
- Programme the fan for up to 12 hours using its timer.
- 72° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control

EnergySilence 1090 Skyline Retro Smart Blue

32" tower fan with 40 W, LED display, touch and remote control, 12 hour timer and oscillation function.

FEATURES:

- 40 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
- 32 inch: improves the fresh air distribution process due to its wide air outlet grille.
- Remote control included: control all its functions remotely.
- LED display to check the selected settings as well as the room temperature.
- Touch control panel, user-friendly.
- 3 speeds and 3 modes: regulate the intensity of the air flow according to the needs of each moment.
- Programme the fan for up to 12 hours using its timer.
- 72° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control

EnergySilence 8090 Skyline tower fan

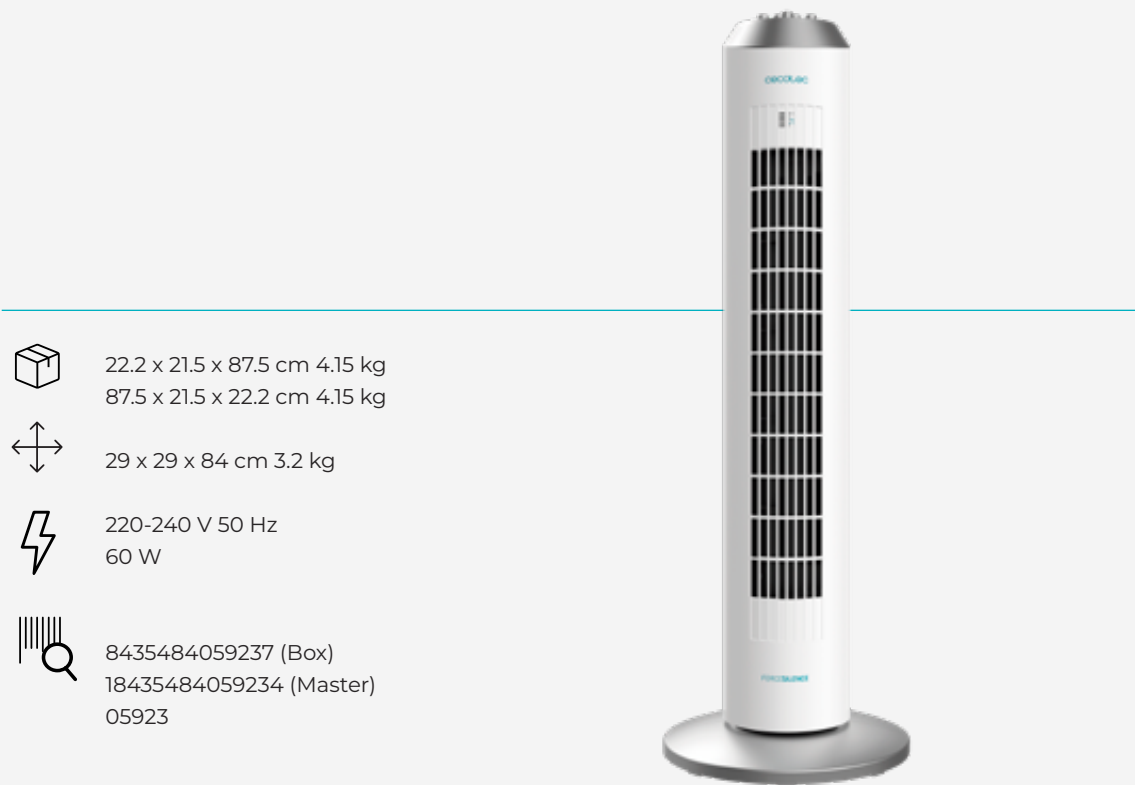

33" mechanical tower fan, 3 speeds.

FEATURES:

- EnergySilence Technology: Instant deep feeling of fresh air with maximum silence and comfort.
- 3Speed Function: 3 speeds in order to adjust air flow to your needs (low,Night, medium-Eco and high-Turbo).
- Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.
- CoolTimer: It includes a programmable timer that can be scheduled up to 120 minutes, time after which the fan turns automatically off for maximum comfort and to save energy.
- Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
- Elegant Design: well-cared design with elegant lines that adapt to your home's decoration. 33" tall (84 cm). It is also light to improve its transportation and storage.
- Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.
- EasytoMove: Easy to transport and to store thanks to its handle.

COMPOSITION:

Fan main body
Instruction manual

EnergySilence 7050 SkyLine Control tower fan

45-W and 33" tower fan with remote control, LED indicator, 3 speed settings, oscillation function and 3 hour timer.

FEATURES:

Great power of 45 W for a better room refreshment, instant and effective. Copper motor that provides it with a great quality, efficiency, durability and power.
Its 33" height (84 cm) allows for a great air flow and intensifies the cooling process, It includes remote control for an easy usability of its functions, without having to control it directly from the fan.
The fan has a panel, in which the function operating or set is displayed.
The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.
70° automatic oscillation for an optimum air distribution around the room.
Programmable timer up to a maximum of 3 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
It includes a comfortable rear handle that allows you to easily move it from one room to another.

EnergySilence 8150 Skyline

55-W and 42" tower fan with remote control, LED display, 3 speed settings, 3 modes, oscillation function and timer.

FEATURES:

55 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
42 inches in height: allows to provide a large airflow to intensify the ventilation process.
Control it easily: thanks to the remote control you can conveniently control all the fan's functions and, thanks to the LED display, you can see the selected functions.
Touch control to select the fan operation and display to see the selected settings.
Regulate the intensity: it has 3 speeds and 3 operating modes (normal, nature, sleep) that allow you to regulate the intensity of the air flow according to the needs of each moment.
80° automatic oscillation for an optimum fresh air distribution around the room.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
It includes a comfortable rear handle that allows you to easily move the fan from one room to another.

EnergySilence 8190 Skyline Ionic tower fan

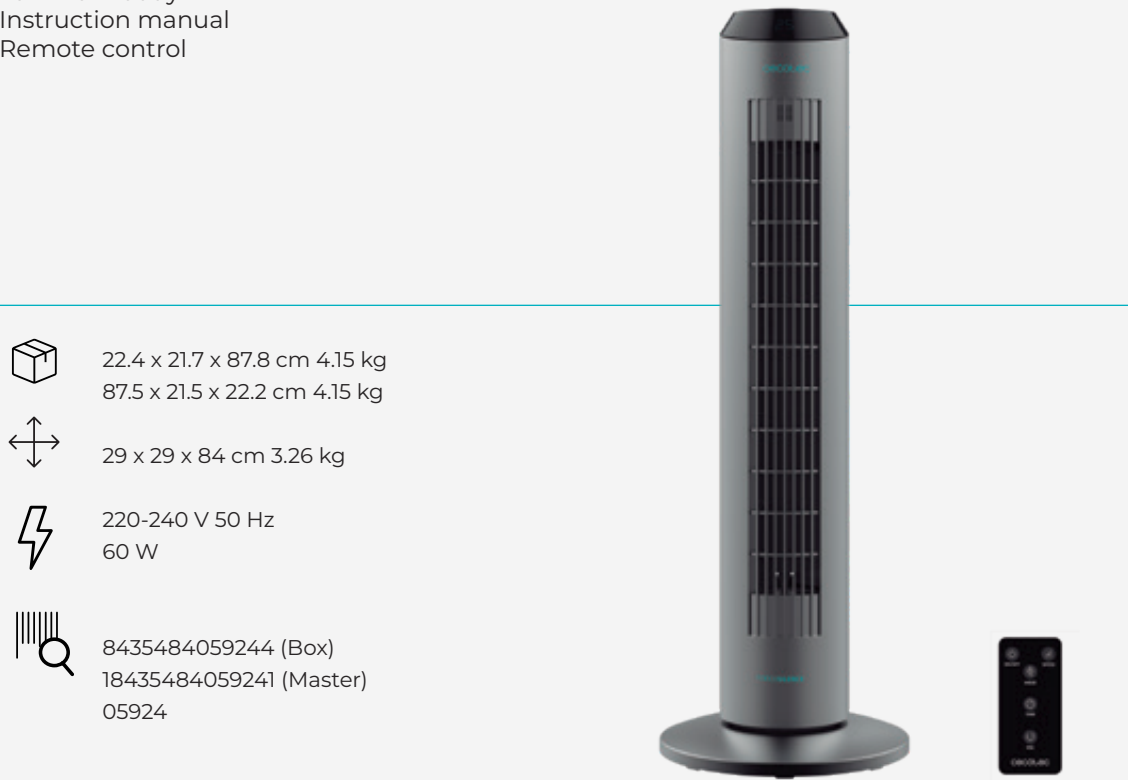

Tower fan, 33", digital and ionizing function.

FEATURES:

EnergySilence Technology: Instant deep feeling of fresh air with maximum silence and comfort.
Protonizerflow: integrated ionizer to enjoy a fresher environment. Improves breathing, rest and relieves headaches produced by dusty environments.
3Speed Function: 3 speeds to adjust the air flow intensity to your needs (low-Sleep, medium-Eco and high-Turbo).
Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.
ControlTotal: Remote control to use all the fan's parameters and schedule it simply and easily. The remote control can be stored in the actual fan.
CoolTimer: It includes a programmable timer of up to 8 hours, time after which the fan turns automatically off for maximum comfort during use and to save energy.
Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Elegant Design: Well-cared design with elegant lines that adapt to your home's decoration. It is also light to improve its transportation and storage.
Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.

EnergySilence 470 Max Skyline Ionic

45-W and 47" ionizer tower fan with touch and remote control, timer, oscillation function and digital display.

FEATURES:

47 inches: great height that facilitates the fresh air distribution process due to its wide air outlet grille.
45 W: high motor power that improves the ventilation of the room in which the fan is placed instantly and efficiently.
LED display and remote control to conveniently control all fan functions and see the selected settings.
Touch control to select fan operation easily and intuitively, and a display to see the settings.
Ionizer: ventilate and clean your room thanks to its ionizer, which is capable of transforming polluted air into clean air thanks to the generation of negative ions.
3 speeds and 3 modes: they allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
70° automatic oscillation for an optimum air distribution around the room.

EnergySilence 9090 Skyline Smart Light

60-W and 42" tower fan with light, timer, remote control, touch control, LED display and oscillation function.

FEATURES:

60 W of power: facilitates the ventilation of the room in which the fan is placed in an instantaneous and efficient way.
42 inches in height: allows to provide a large airflow to intensify the ventilation process.
LED display and remote control to conveniently control all fan functions and see the selected settings.
Touch control to select the fan operation and display to see the selected settings.
LED light: the fan has a decorative LED light that borders the fan.
Regulate the intensity: it has 6 speeds and 3 operating modes (normal, nature, sleep) that allow you to regulate the intensity of the air flow according to the needs of each moment.
Programmable timer up to a maximum of 9 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
150° automatic oscillation for an optimum fresh air distribution around the room.

EnergySilence 9890 Skyline Bladeless

39" bladeless tower fan with 50 W, LED display, touch and remote control, 15 hour timer and oscillation function.

FEATURES:

Bladeless Technology: facilitates the distribution of fresh air and provides maximum safety in the process. Additionally, the minimalist and well-cared design with elegant lines perfectly adapts to your home decoration.

39 inches high: facilitates the fresh air distribution process due to its wide air outlet grille.

High power of 50 W: improves the ventilation of the room in which the fan is placed instantly and effectively.

Operate the fan conveniently with just one touch and with its remote control. Moreover, the selected configuration is shown on the LED display.

Programme the fan for up to 15 hours using its timer.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

3 operating modes: (natural, normal, sleep) for great adaptability according to needs.

40° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control

EnergySilence 9850 Skyline Bladeless Pro bladeless tower fan

Tower fan with 26 W and motor DC, bladeless technology and adjustable height. LED display, remote control, touch control, 9 speed settings, 2 modes, oscillation, timer and elegant design.

FEATURES:

DC motor with 26 W which enables ventilation of the room as it provides the fan with great quality, efficiency and durability, as well as collaborating in its ventilation process in a silent way and reducing energy consumption.

Thanks to its innovative block structure, you can regulate the height of the fan according to your needs. You can achieve a maximum height of 96 cm.

Its Bladeless technology allows for a great heat distribution and ensures increased safety during operation, while being noiseless.

Total control of the fan thanks to its touch panel and remote control. The settings are displayed on its LED display.

The 9 speed options and 2 operating modes (night and turbo) allow you to adjust the air flow intensity according to your needs and moment.

80° automatic oscillation for an optimum air distribution around the room.

Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.

Minimalist and well-cared design with elegant lines that adapts to your home decoration.

EnergySilence 9890 Skyline Bladeless Dark

39" bladeless tower fan with 50 W, LED display, touch and remote control, 15 hour timer and oscillation function.

FEATURES:

Bladeless Technology: facilitates the distribution of fresh air and provides maximum safety in the process. Additionally, the minimalist and well-cared design with elegant lines perfectly adapts to your home decoration.

39 inches high: facilitates the fresh air distribution process due to its wide air outlet grille.

High power of 50 W: improves the ventilation of the room in which the fan is placed instantly and effectively.

Operate the fan conveniently with just one touch and with its remote control. Moreover, the selected configuration is shown on the LED display.

Programme the fan for up to 15 hours using its timer.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

3 operating modes: (natural, normal, sleep) for great adaptability according to needs.

40° automatic oscillation for an optimum air distribution around the room.

COMPOSITION:

Fan, instruction manual, remote control

EnergySilence 9800 Skyline Bladeless Black tower fan

Digital bladeless tower fan, 38".

FEATURES:

AirBladeless: innovating technology without blades that takes in air in the environment and redirects it, creating a powerful refreshing air flow very fast.

EnergySilence Technology: Instant deep feeling of fresh air with maximum silence and comfort.

Minimal Design: well-cared minimalist design, 96-cm tall (38") with elegant lines that adapt to your home's decoration. It is also light to improve its transportation and storage.

9Speed Function: 9 speeds to adjust air flow intensity to each of your needs.

Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.

ControlTotal: Remote control to use all the fan's parameters and schedule it simply and easily.

CoolTimer: Programmable timer of up to 8 hours, time after which the fan turns automatically off for maximum comfort during use and to save energy.

Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.

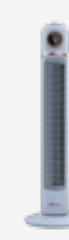

EasytoMove: Easy to transport and to store thanks to its handle.

Oscillation.

*Technologies and performance may vary depending on the model.

EnergySilence 4500 Power Box

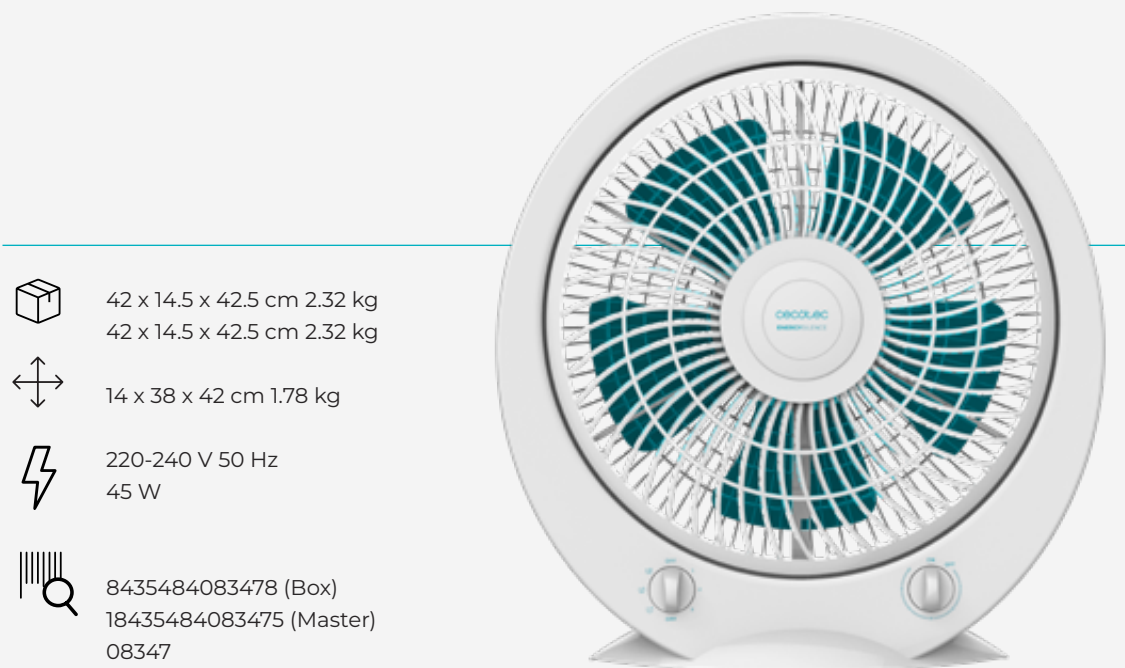

Floor fan with 45 W, 12 inches, 3 speeds, timer, silent, easy to use and maximum safety.

FEATURES:

45 W: high power motor that facilitates the ventilation of the room in which the fan is located.
12 inches: they give it a large diameter that boosts the airflow output, together with its 5 blades.
3 speeds: choose between Low, Medium and High speeds, which allow you to regulate the intensity of the air flow according to your needs at any given moment.
Programmable timer up to a maximum of 1 hour, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Multidirectional rotating grille: for greater air circulation and to increase the feeling of freshness in the room.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.
EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

COMPOSITION:

EnergySilence 6000 PowerBox floor fan

50-W box fan, 5 blades, 12".

FEATURES:

EnergySilence Technology: Instant deep feeling of fresh air with maximum silence and comfort.

SuperFlow: Powerful fan, 50. Refreshes efficiently.

AirFlow5: system that consists of 5 blades 30 cm/12" diameter, to ensure maximum and efficient fresh-air flow release. Enjoy maximum freshness and minimum consumption.

3Speed Function: 3 operating speeds (low-Sleep, medium-Eco and high-Turbo) to adjust the air flow intensity to your needs.

Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.

MultiGyro: multidirectional rotary grid to increase air circulation and freshness.

Total Control: System that allows adjusting the air flow's angle of incidence thanks to its grid's oscillation lock.

CoolTimer: Programmable timer of up to 120 minutes, time after which the fan turns automatically off for maximum comfort and to save energy.

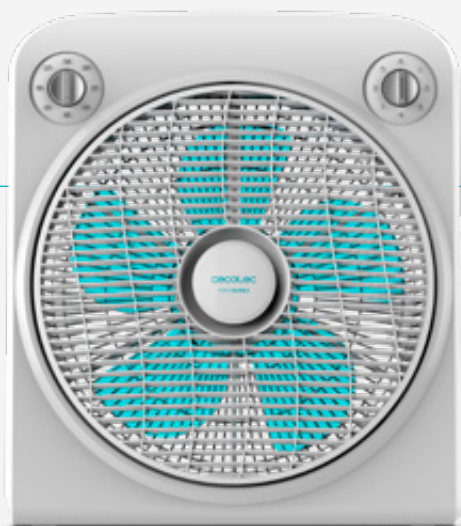

Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.

EasytoMove: Light design for an easier transport and storage thanks to its compact size and its handle.

Ideal to use it at home or at work, without noise or distractions.

EnergySilence 900 FloorFlow

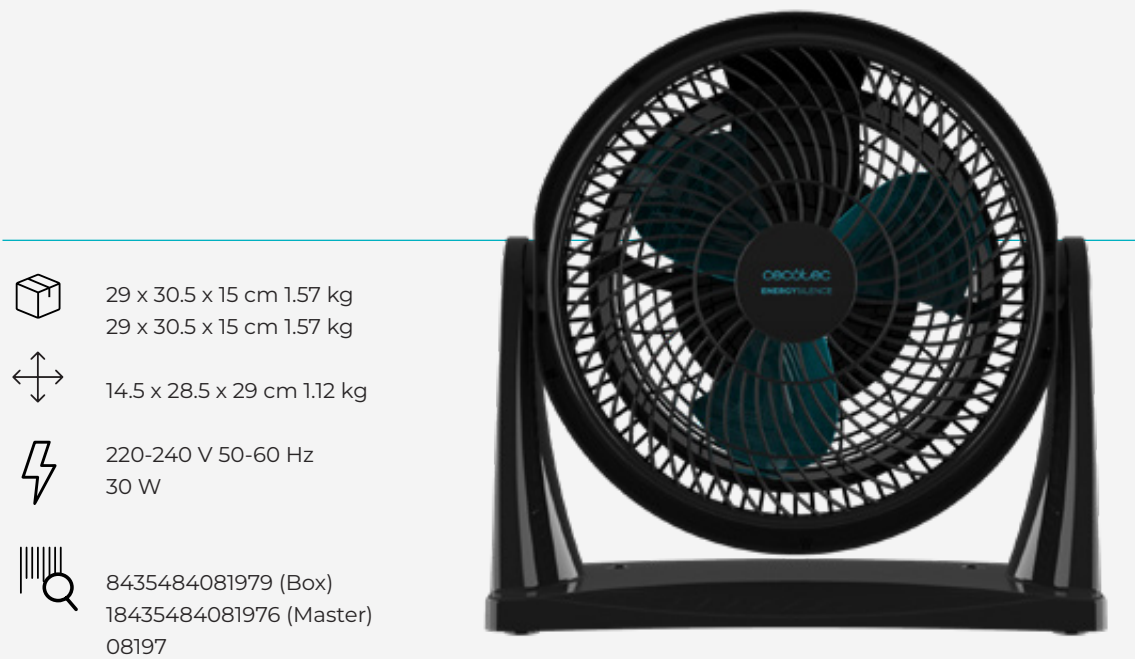

9" and 30 W industrial fan, 2 speeds, 3 blades, easy to use and maximum safety.

FEATURES:

30 W: high power motor that facilitates the ventilation of the room in which the fan is located.
9 inches: give it a large diameter that boosts airflow output.
2 speeds: choose between Low or High mode and regulate the intensity of the air flow according to the needs of the moment.
3 blades: aerodynamic blades ensure maximum fresh air flow in the most efficient way.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan, instruction manual

EnergySilence 1400 FloorFlow

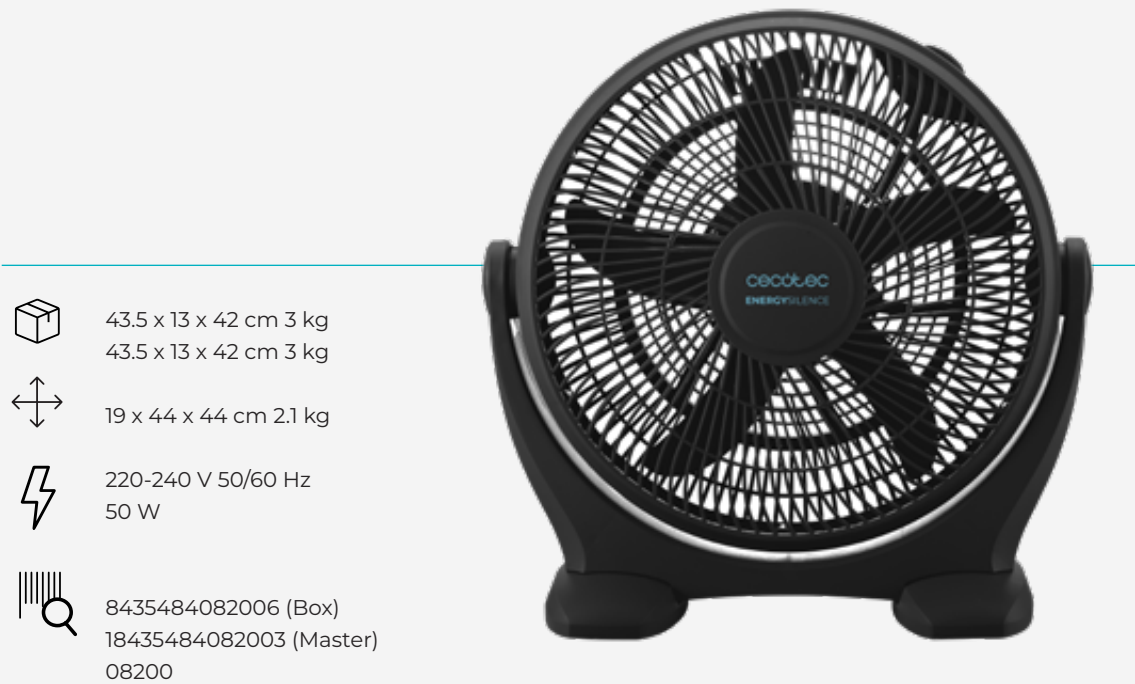

14" and 50 W industrial fan, 3 speeds, 5 blades, easy to use and maximum safety.

FEATURES:

Very powerful: 50 W which facilitates the ventilation of the room in which the fan is placed.
Large diameter: the fan has a diameter of 14 inches, which provides power to the airflow output.
3 speeds: Low, Medium and High so that you can regulate the intensity of the air flow according to the needs of each moment.
It has 5 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
Easy to use: enjoy convenient fan control and select fan operation quickly and intuitively.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan, instruction manual

EnergySilence 2000 FloorFlow

20" and 90 W industrial fan, 3 speeds, 5 blades, easy to use and maximum safety.

FEATURES:

Very powerful: 90 W which facilitates the ventilation of the room in which the fan is placed.
Large diameter: the fan has a diameter of 20 inches, which provides power to the airflow output.

3 speeds: Low, Medium and High so that you can regulate the intensity of the air flow according to the needs of each moment.

It has 5 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.

Easy to use: enjoy convenient fan control and select fan operation quickly and intuitively.

Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

EnergySilence 1000 Pro industrial fan

12" and 40-W industrial fan, 3 speeds, 3 blades, easy to use, elegant design, and maximum safety.

FEATURES:

Great power of 40 W to facilitate room ventilation.

Its 12", equal to 30 cm, provide it with a great diameter which results in powerful air flows.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

It has 3 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.

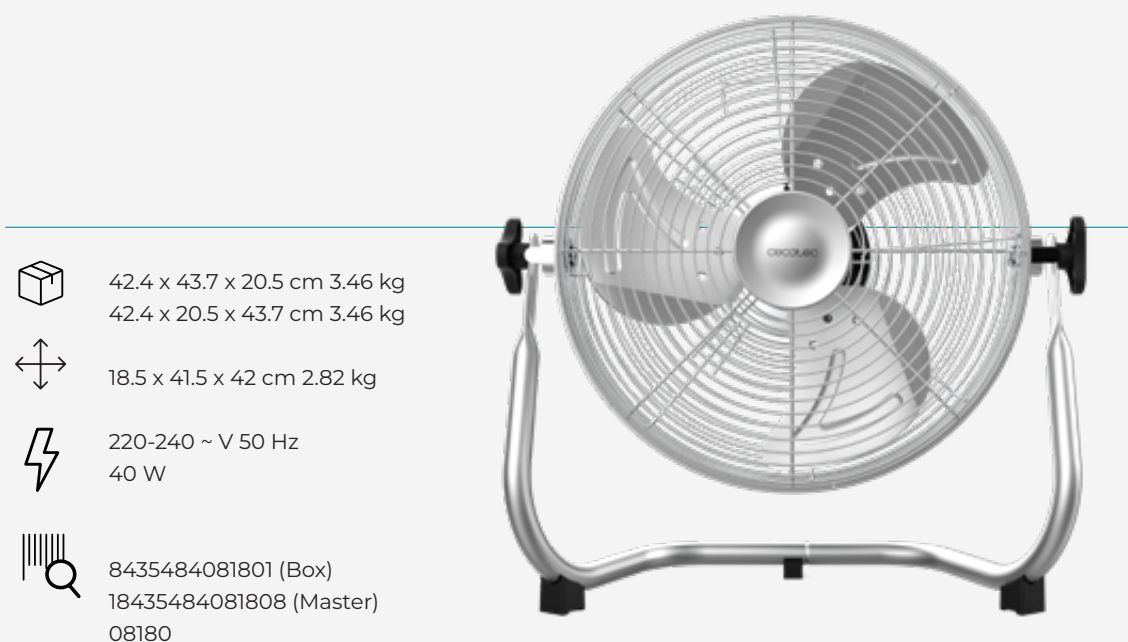

Its simple usability allows for convenient control of the fan and quick and intuitive operation selection.

The steel finish provides the fan with an elegant design.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan main body
Instruction manual

EnergySilence 3000 Pro industrial fan

3-blade industrial fan, 16", 90 W, and 3 speeds.

FEATURES:

Power Wind Pro: Professional fan, maximum power, produces powerful air flow thanks to its high-quality materials and design.

AirFlow3 Pro: system that consists of 3 metallic blades (40 cm/16" diameter) to ensure maximum and efficient fresh-air flow release.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates TermoSafe security system to lengthen the fan's shelf life and to avoid incidents and faults.

3Speed Function: Choose between its 3 operating speeds (low, medium and high) in order to adjust the air flow intensity to your needs.

Total Control: The fan's tilt grade can be adjusted just by pressing the fan's cover, adapting to all users and situations.

Security System: Integral security system composed of a safety grid that prevents access to the blades.

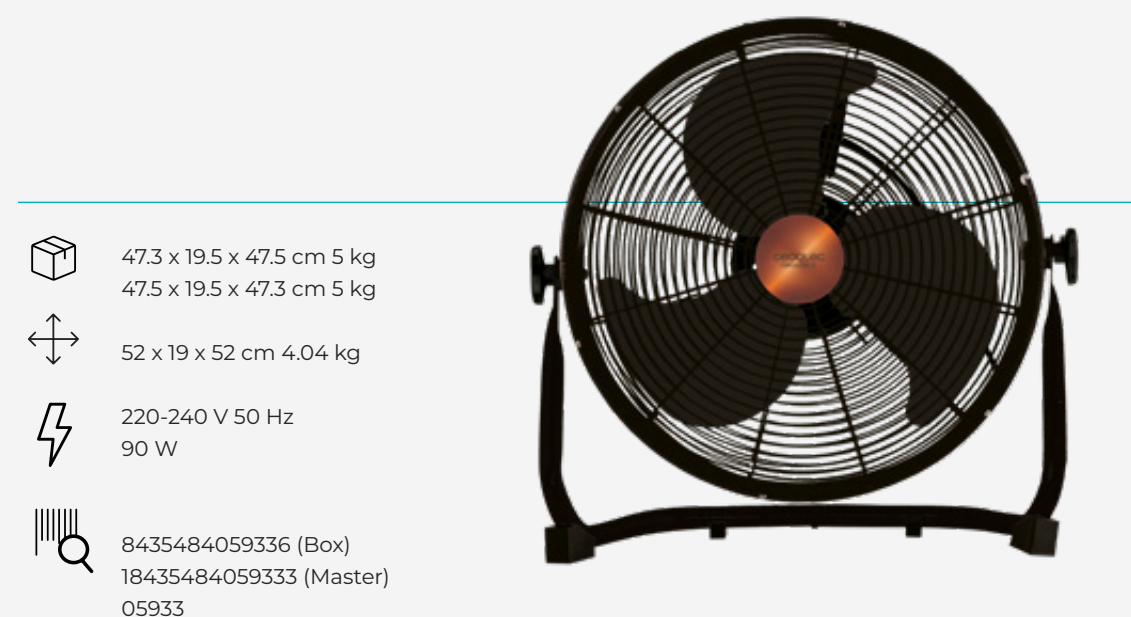

Very stable base.

Health&Safety: The fan complies with environmental safety and protection current legislation, so you can take care of your people and your environment.

Maximum-quality metallic finishings to ensure the best performance in harsh environments: industrial, commercial and outdoors.

COMPOSITION:

EnergySilence 400 RetroDesk Pink

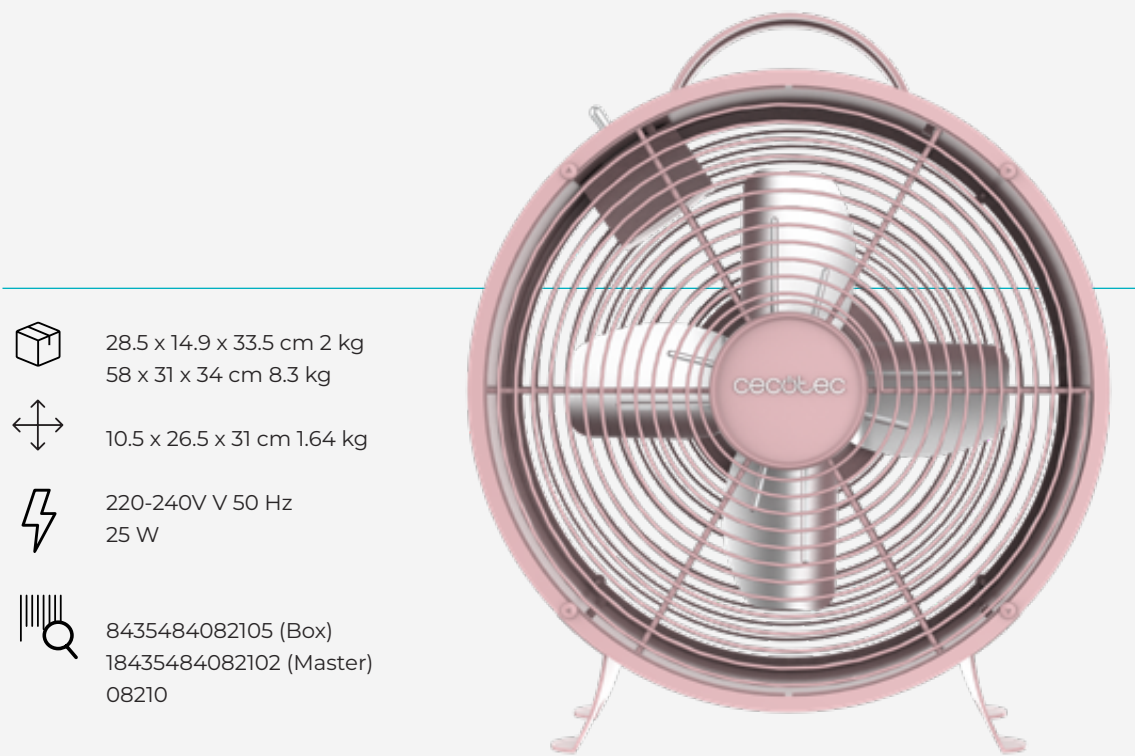

Retro style 8" pink desktop fan with 25 W and 4 blades.

FEATURES:

25 W: high power motor that facilitates the ventilation of the room in which the fan is located.
8 inches: give it a large diameter that boosts airflow output.
It has 4 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.
2 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
Elegant design: it will blend in perfectly with your home décor thanks to its sleek, minimalist design.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.
Maximum safety thanks to its strong and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Desktop fan, instruction manual

-  28.5 x 14.9 x 33.5 cm 2 kg
58 x 31 x 34 cm 8.3 kg
-  10.5 x 26.5 x 31 cm 1.64 kg

EnergySilence 600 WoodDesk desktop fan

Table fan with 40 W and wood-colour finish, 12 inches, 3 speeds, oscillation, silent, adjustable height, 4 blades, and maximum safety.

FEATURES:

Great power of 40 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

Its 12", equal to 30 cm, provide it with a great diameter which results in powerful air flows.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort

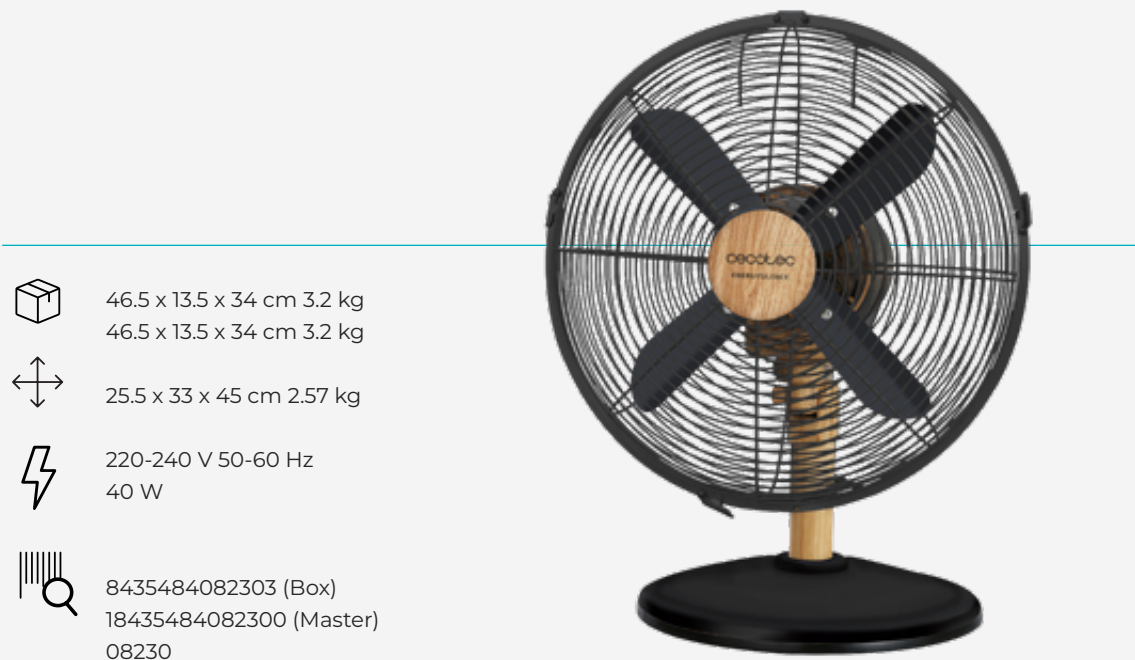

It has 4 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.

Elegant wood-finish design, making it the ideal fit for any room in the house.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

Fan main body
Instruction manual

EnergySilence 610 SteelDesk desktop fan

Table fan with 40 W and steel finish, 12 inches, 3 speeds, oscillation, silent, adjustable height, 4 blades, and maximum safety.

FEATURES:

Great power of 40 W that facilitates the ventilation of the room that together with its copper motor provides a great quality, efficiency and durability to the fan, as well as collaborating in its ventilation process.

Its 12", equal to 30 cm, provide it with a great diameter which results in powerful air flows.

It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.

Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.

EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.

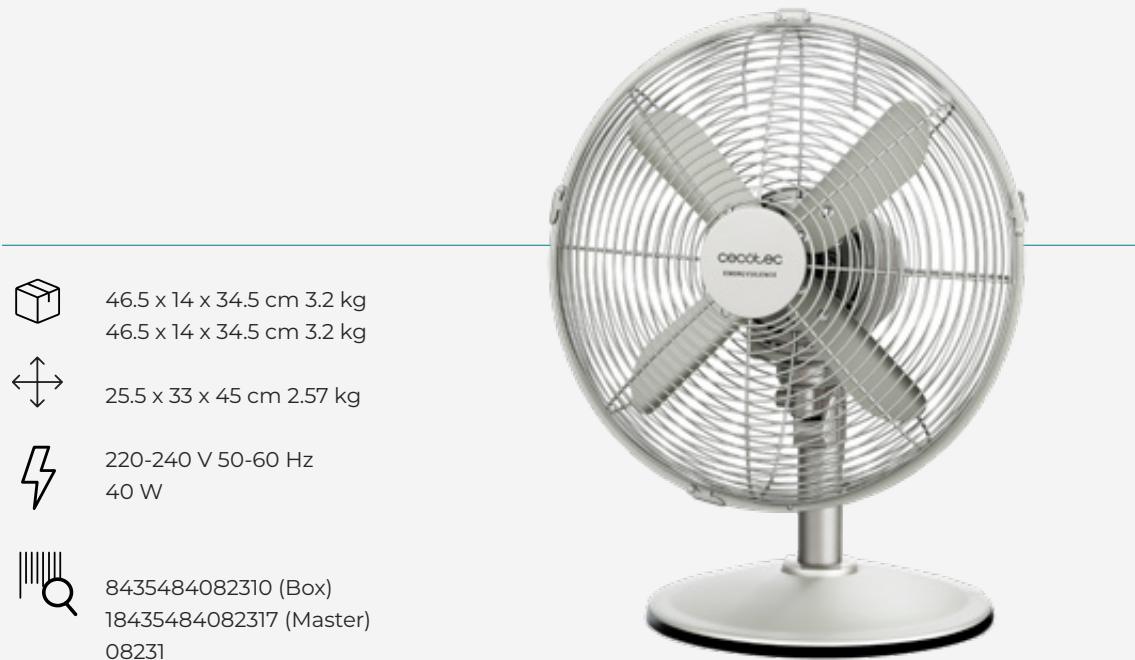

It has 4 aerodynamic blades to ensure maximum fresh air flow in the most efficient way.

Elegant steel-finish design, making it the ideal fit for any room in the house.

Maximum safety thanks to its sturdy and stable base and its grille to prevent fingers from getting into the fan.

COMPOSITION:

EnergySilence 1090 RetroDesk Design

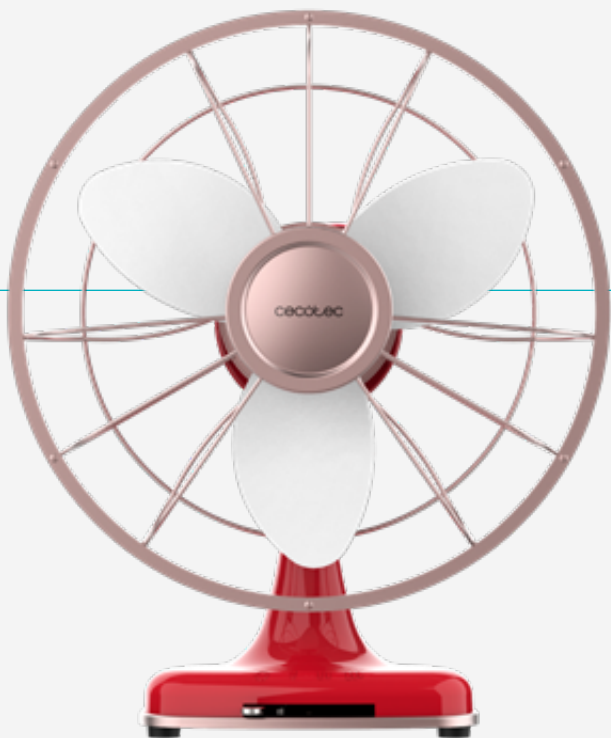

12" retro desktop fan with 40 W, 3 blades, 3 speeds, adjustable oscillation and tilt.

FEATURES:

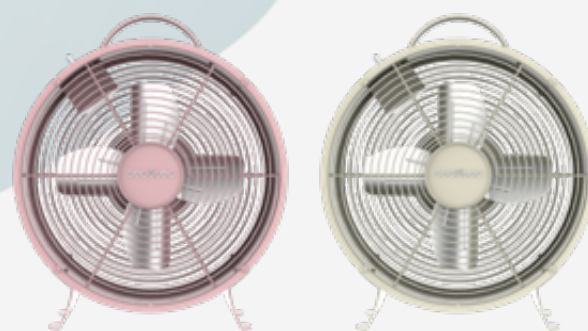

40 W: high power motor that facilitates the ventilation of the room in which the fan is located.
12 inches: give it a large diameter that boosts airflow output.
3 EVA blades: it has 3 aerodynamic blades made of EVA material, which guarantees great versatility and maximum safety and allows it to supply the maximum flow of fresh air in the most efficient way.
Elegant design: it will blend in perfectly with your home décor thanks to its sleek, minimalist design.
It has 3 speeds (Low, Medium and High) that allow you to regulate the intensity of the air flow according to the needs of each moment.
80° oscillation: allows total control of the desired air direction in the room where the fan is located.
Adjustable tilt to achieve a large airflow in the desired direction.
Easy to use: allows convenient control of the fan and quick and intuitive selection of fan operation.

*Technologies and performance may vary depending on the model.

EnergySilence 4500 Power Wall

50-W and 16" wall-mounted fan with 3 speeds, 4 blades and easy to operate.

FEATURES:

50 W: high power that facilitates the ventilation of the room in which the fan is located.
18 inches: equivalent to 45 cm, giving it a large diameter that boosts airflow.
4 aerodynamic blades: its aerodynamic blade system is designed to maximise airflow and ensure a constant flow of fresh air.
Easy operation: control all fan functions in the most practical and accessible way, by means of its chain switch.
3 speeds: Low, Medium and High that allow you to regulate the intensity of the air flow according to the needs of each moment.
Easy to assemble: mount it quickly and easily, as the fan has all the necessary elements for its installation.

COMPOSITION:

Fan, instruction manual

EnergySilence 4500 Power Wall Control

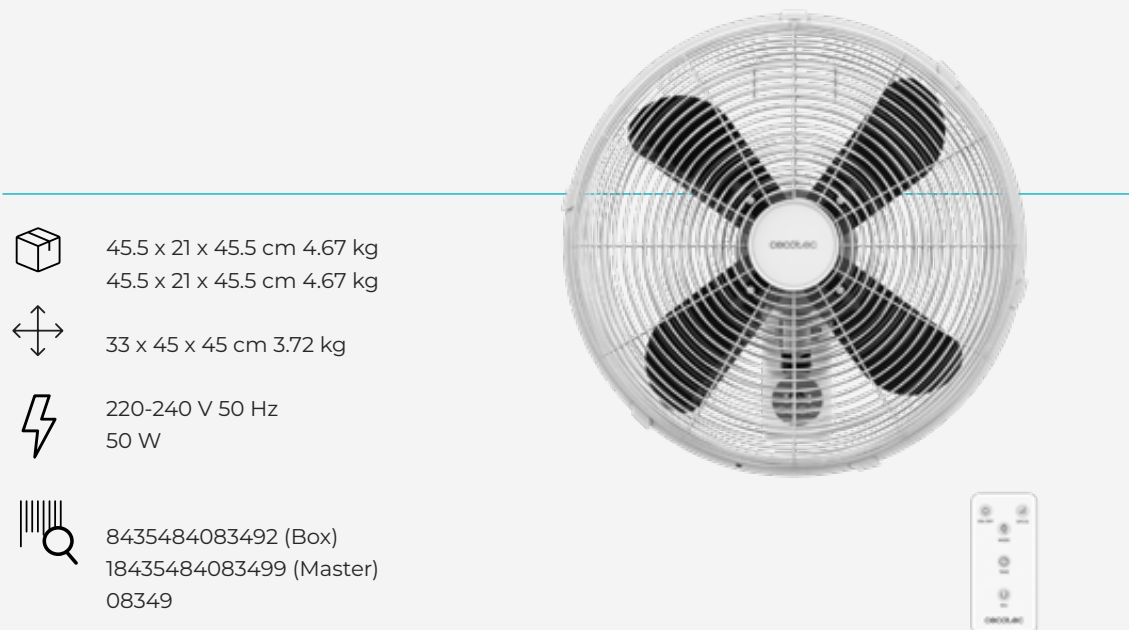

50-W and 16" wall-mounted fan with remote control, timer and display.

FEATURES:

50 W: high power that facilitates the ventilation of the room in which the fan is located.
18 inches: equivalent to 45 cm, giving it a large diameter that boosts airflow.
4 aerodynamic blades: its aerodynamic blade system is designed to maximise airflow and ensure a constant flow of fresh air.
LED display and remote control: conveniently control its functions and see the selected settings on its LED display.
3 speeds: Low, Medium and High that allow you to regulate the intensity of the air flow according to the needs of each moment.
Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Easy to assemble: mount it quickly and easily, as the fan has all the necessary elements for its installation.

COMPOSITION:

Fan, instruction manual, remote control, battery (2 x AAA, not included)

EnergySilence 4500 Power Wall Control Black

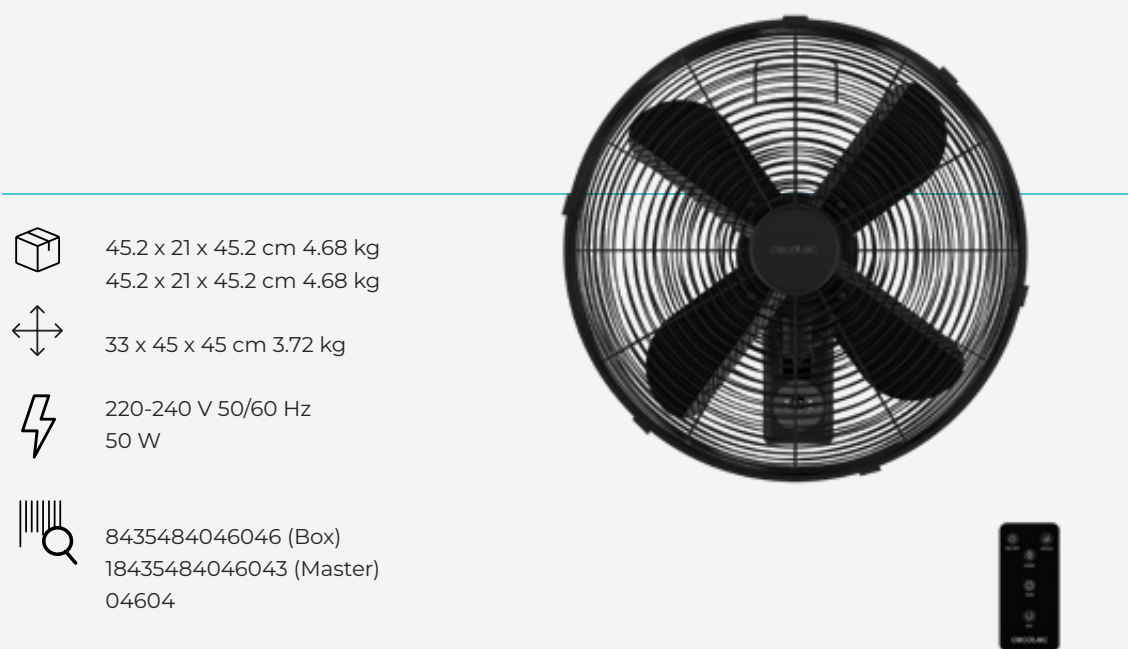

50-W and 16" wall-mounted fan with remote control, timer and display.

FEATURES:

32" ceiling fan with 6 reversible blades, 50 W.

FEATURES:

Great power, 50 W and high-performance copper motor that increases air flow and freshness feeling, offering maximum liability and durability.
Wide diameter, 32" (82 cm) that increases the fresh air coverage area.
The fan has a lamp that turns it into a useful hybrid unit. Get light and a perfect environment at your home in the most economical and effective way (bulb not included).
Choose from its 3 operating speeds (Low, Medium and High), in order to adjust the air flow intensity to your needs.
System composed of 6 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.
Careful design with elegant lines that adapt to your home decoration. Also, its blades are totally reversible and allow you to choose, at every moment, between 2 options.
The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. Perfect to complement your heating system.
Easy management thanks to its pull chain system. Control all the fan's functions in the most useful and accessible way.

EnergySilence Aero 3600 Vision Full

EnergySilence Aero 3600 Vision Full SunLight

50-W and 36" ceiling fan with lamp, 3 speed settings, 6 reversible blades, winter-summer mode and easy usability.

FEATURES:

50 W high power: with high performance copper motor that increases airflow and cooling sensation with maximum reliability and durability.
Large diameter: 36 inches (92 cm) which increases the fresh air coverage in the room.
Built-in lamp: get brightness and a perfect atmosphere at home in the most effective and affordable way (bulb not included).
3 operating speeds: Low, Medium and High to adjust the airflow intensity to your needs.
6 blades: innovative, aerodynamic blades designed to maximise airflow and ensure a constant flow of fresh air.
Stylish design: it will fit in perfectly with your home decor. Also, its blades are totally reversible and allow you to choose, at every moment, between 2 options.
Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. You can choose to have a pleasant breeze in summer or, in the opposite direction, to blow warm air downwards and thus complement your heating system in winter.
Easy operation: switch the fan on with the chain switch and thus control all its functions.

EnergySilence Aero 4260 / 4260 Full

EnergySilence Aero 4260 SunLight Ceiling fan

40-W and 42" ceiling fan with DC motor, LED light, remote control, timer, 6 speed settings and 5 reversible blades.

FEATURES:

Great power, 32 W and high-performance copper motor that increases air flow and freshness feeling, offering maximum liability and durability. Its DC motor improves the fan's operating, increasing efficiency and consuming less energy. Moreover, its operating is extremely silent. Wide diameter, 42" (106 cm) that increases the fresh air coverage area. The fan has a LED lamp that turns it into a useful hybrid unit. Enjoy light and a perfect environment at home in the most economical and effective way. Select one of its 3 available colours.

Easy and simple control thanks to its remote control. Its timer allows selecting the desired operating time, up to 8 hours, and then the device turns automatically off.

Choose from its 6 operating speeds in order to adjust the air flow intensity to your needs. System composed of 5 totally innovating reversible and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.

The fan includes a motor-turnaround system in order to operate the Summer/Winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. EnergySilence Aero 3050

EnergySilence Aero 3050 Sky

35-W DC motor and 36" ceiling fan with LED light, remote control, timer, 6 speed settings and 3 blades.

FEATURES:

- 35 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
- 36 inches: large diameter that allows a large coverage of fresh air in the room where the fan is located.
- LED lamp: 18 W lamp with which you can achieve brightness and a perfect atmosphere in your home in the most effective and affordable way by selecting from the 3 available shades.
- Remote control: convenient and simple control thanks to its remote control, with which you can easily operate the fan.
- Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
- 6 speeds available: choose between its 6 operating speeds, adapting the intensity of the air flow to your needs.
- 3 blades: its system of 3 aerodynamic blades is designed to maximise airflow and ensure a constant flow of fresh air.
- Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

EnergySilence Aero 4600 Helicopter

Helicopter design ceiling fan with 35-W DC motor and 32-W LED light, 4 blades, 6 speeds, 39", timer up to 8 hours and winter/summer mode.

FEATURES:

Kids design: discover innovation in lighting and comfort with our helicopter fan, a unique combination of lamp and fan designed especially for the little ones at home.

High power: the high-performance DC motor with 36 W increases the airflow and the cooling sensation with maximum reliability and durability.

Large diameter: with 39 inches (100 cm) , you will not only increase the fresh air coverage in the room, but also add a special touch to the decor.

LED lamp: get light and a perfect atmosphere in your home in the most affordable way with the built-in 32-W LED lamp. The lamp will be perfect to light up story time and nights of magical dreams.

Timer: select between 1, 2, 4 and up to 8 hours of operation. Once the selected time has elapsed, the fan will switch off automatically.

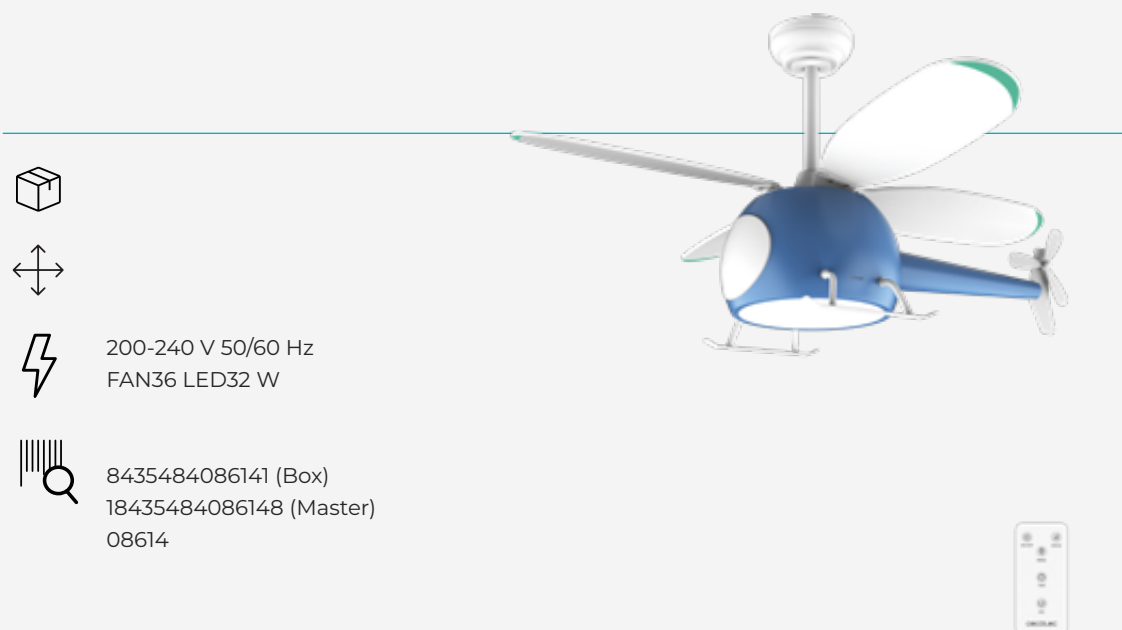

6 operating speeds: choose between Low, Medium and High speeds and adjust the airflow intensity according to your preferences.

4 aerodynamic blades: the blades are designed to maximise airflow and ensure a constant flow of fresh air.

Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

EnergySilence Aero 4850 Style White / Black / Steel

EnergySilence Aero 4850 Style White ceiling fan

30 W 48" ceiling fan with LED light, remote control, 6 speeds, 3 modes (Low/Medium/High), 3 blades, winter-summer mode, and natural breeze mode.

FEATURES:

Great power of 30 W, with a high-performance DC motor for an increased airflow and feeling of freshness, with maximum reliability and durability. Its DC direct-current motor improves the operation of the fan, thus increasing efficiency and generating less power consumption. Moreover, its operating is extremely silent.

Wide diameter, 48" (122 cm) that increases the fresh air coverage area. System composed of 3 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.

The fan features a 22 W LED lamp, making it a practical hybrid unit. Enjoy light and a perfect environment at home in the most economical and effective way.

Easy and simple control thanks to its remote control.

Its timer allows selecting the desired operating time, 1, 2, 4, or 8 hours, and then the device turns automatically off.

Choose from its 3 operating speeds (Low, Medium and High) to adjust the air flow to your needs.

Choose from its 6 operating speeds in order to adjust the air flow intensity to your needs.

The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. Perfect to complement your heating system.

Includes Natural breeze function. Once a specific speed is set, the fan is capable of adapting the air flow to the speed setting considering the environment. This results in a smoother and much more pleasant cooking.

EnergySilence Aero 5200 Black / White

EnergySilence Aero 5200 Black

40-W and 48" ceiling fan with light, 3 speeds, timer and winter-summer mode.

FEATURES:

- 40 W copper motor: its high-performance copper motor increases airflow and the feeling of freshness, with maximum reliability and durability.
- 48 inches: large diameter of 122 cm which allows a large coverage of fresh air in the room where the fan is placed.
- LED lamp: 18 W lamp with which you can achieve brightness and a perfect atmosphere in your home in the most effective and affordable way by selecting from the 3 available shades.
- Remote control: convenient and simple control thanks to its remote control, with which you can easily operate the fan.
- 3 speeds: you can choose between 3 operating speeds (Low, Medium and High), adapting the intensity of the air flow to your needs.
- Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
- 3 blades: its system of 3 aerodynamic blades is designed to maximise airflow and ensure a constant flow of fresh air.
- Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

COMPOSITION:

Fan, instruction manual, remote control, remote control battery (2xAAA)

EnergySilence Aero 570 ceiling fan

52" ceiling fan with 4 blades, 60 W, LED lamp and summer/winter function.

FEATURES:

Great power, 60 W and high-performance copper motor that increases air flow and freshness feeling, offering maximum liability and durability.

Wide diameter, 52" (132 cm) that increases the fresh air coverage area.

The fan has a LED lamp that turns it into a useful hybrid unit. Enjoy light and a perfect environment at home in the most economical and effective way. Select one of its 3 available colours.

Easy and simple control thanks to its remote control.

Its timer allows selecting the desired operating time, 1, 4, or 8 hours, and then the device turns automatically off.

Choose from its 3 operating speeds (Low, Medium and High), in order to adjust the air flow intensity to your needs.

System composed of 4 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.

The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. EnergySilence 4800 Light

EnergySilence 4800 Light White

35-W DC motor and 48" ceiling fan with 36-W LED light, remote control, timer, 6 speed settings and 3 blades.

FEATURES:

High power: enjoy high performance with the 36 W motor that increases the airflow and the feeling of freshness, with maximum reliability and durability. In addition, the DC motor increases the efficiency of the fan and generates less power consumption by working quietly.

Large diameter: 48 inches of the fan increases the fresh air coverage in the room.

LED lamp: the fan is equipped with a 36-W LED light that provides the perfect brightness and atmosphere in your home in the most effective and affordable way. Select any of its 3 available shades.

Convenient operation thanks to its remote control through which you can select the operation of the fan.

Timer: select between 2, 4 and up to 8 hours of operation. Once the selected time has elapsed, the fan will switch off automatically.

6 operating speeds: adjust the intensity of the airflow according to your preferences.

3 aerodynamic blades: the blades are designed to maximise airflow and ensure a constant flow of fresh air.

Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

EnergySilence Aero 5290 Stone Pro / Golden Pro

EnergySilence Aero 5290 Stone Pro ceiling fan

50-W and 52" ceiling fan with DC motor and LED light.

FEATURES:

Great power, 50 W and high-performance copper motor that increases air flow and freshness feeling, offering maximum liability and durability. Its DC motor improves the fan's operating, increasing efficiency and consuming less energy. Moreover, its operating is extremely silent. Wide diameter, 52" (132 cm) that increases the fresh air coverage area. System composed of 3 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.

The fan has a 24 W LED lamp that turns it into a useful hybrid unit. Enjoy light and a perfect environment at home in the most economical and effective way. Choose from its 3 available colours and adjust the light intensity.

Easy and simple control thanks to its remote control.

The fan can be adjusted in height from 15 cm to 25 cm. Choose the one that suits your home and your needs better.

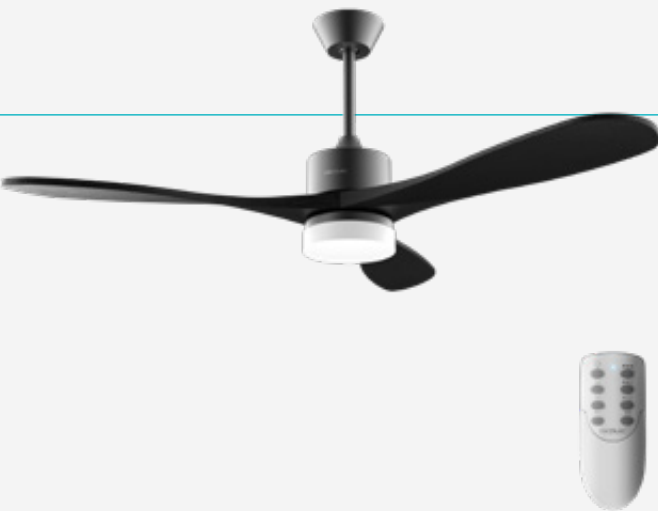

Choose from its 5 operating speeds in order to adjust the air flow intensity to each situation. Its timer allows you to select 2 or 8 hours of operation, after which the fan will switch off.

The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. Perfect to complement your heating system. Control it from the remote control.

EnergySilence Aero 4800 Pro

Industrial ceiling fan with 88 W, 52", remote control, 3 blades, timer up to 8 hours and 5 speeds.

FEATURES:

High power: 88 W of power from the high-performance copper motor increases the airflow and the feeling of freshness, with maximum reliability and durability.

52 inches: with a large diameter of 132 cm, which allows a large coverage of fresh air in the room where the fan is placed.

5 speeds available: adapt the intensity of the air flow to your needs.

3 aerodynamic blades: designed to maximise airflow and ensure a constant flow of fresh air.

Original design: the fan features a metallic design with sleek lines that fits in perfectly with your home décor.

Programmable timer: programme the fan for the time you want in a range of 1, 4 and up to 8 hours. Afterwards, the fan will switch off automatically.

COMPOSITION:

Fan body, assembly kit, instruction manual

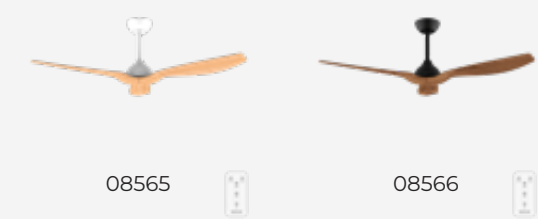

220-240 V 50 Hz
93 W

EnergySilence Aero 5200 WhiteWood / BlackWood

EnergySilence Aero 5200 LightWood

35-W and 52" ceiling fan with DC motor, remote control, adjustable height, programmable timer and winter-summer mode.

FEATURES:

- 35 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
- 52 inches: with a large diameter of 132 cm, which allows a large coverage of fresh air in the room where the fan is placed.
- Remote control: control the fan remotely thanks to its remote control, with which you can easily manage the fan's operation.
- Programmable timer to programme the fan for as long as you want. Afterwards, the fan will switch off automatically.
- 6 speeds available: adapt the intensity of the air flow to your needs.
- 3 blades: innovative, aerodynamic blades are designed to maximise airflow and ensure a constant flow of fresh air.
- Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. You can choose to have a pleasant breeze in summer or, in the opposite direction, to blow warm air downwards and thus complement your heating system in winter.
- Adjustable height: the fan is fully adjustable with two tubes for height adjustment of 12.5 or 25 cm to suit every user and situation.

COMPOSITION:

Fan, instruction manual, assembly kit, remote control, remote control batteries (2*AAA)

220-240 V 50/60 Hz
40 W

EnergySilence Aero 580 / 590

EnergySilence Aero 580 ceiling fan

65-W and 52" ceiling fan with remote control, timer, winter-summer mode, 3 speed settings and 3 blades.

FEATURES:

Powerful, 65 W, with high-performance motor that increases air flow and freshness feeling. Wide diameter, 52" (132 cm) that increases the fresh air coverage area. Easy and simple control thanks to its remote control. Its timer allows selecting the desired operating time, 1, 4, or 8 hours, and then the device turns automatically off. Choose from its 3 operating speeds (Low, Medium & High), in order to adjust the air flow intensity to your needs. System composed of 3 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow. The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. Perfect to complement your heating system. Well-cared wooden design with elegant lines that adapt perfectly to your home's decoration.

EnergySilence Aero 5270

EnergySilence Aero 5270 DarkWood

40-W and 52" ceiling fan with DC motor, remote control, double height, timer and winter-summer mode.

FEATURES:

- 40 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
- 52 inches: large diameter of 132 cm which allows a large coverage of fresh air in the room where the fan is placed.
- Remote control: convenient and simple control thanks to its remote control, with which you can easily operate the fan.
- Programmable timer which allows you to select up to 8 hours of operation, after which the fan will automatically switch off.
- 6 speeds available: choose between its 6 operating speeds, adapting the intensity of the air flow to your needs.
- 3 totally innovative and aerodynamic blades, designed to maximise airflow and ensure a constant flow of fresh air.
- Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.
- Adjustable height: the fan is fully adjustable with two tubes for height adjustment of 15 or 25 cm to suit every user and situation.

RoundLight Design

Designer ceiling fan with 23-W DC motor, 22-W LED light, remote control, 3 blades, 6 speeds, winter-summer mode and timer up to 8 hours.

FEATURES:

Original design: the fan has a metal lampshade that adds a modern and elegant touch to any space. In addition, its surrounding light ring provides a soft and enveloping illumination, creating a cosy and pleasant atmosphere.

High power: the high-performance DC motor with 23 W increases the airflow and the cooling sensation with maximum reliability and durability.

Large diameter of 26 inches (66 cm) which increases the fresh air coverage in the room.

Built-in lamp: get brightness and a perfect atmosphere at home in the most effective and affordable way.

Convenient operation thanks to its remote control through which you can select the operation of the fan.

Timer: select between 1, 4 and up to 8 hours of operation. Once the selected time has elapsed, the fan will switch off automatically.

6 operating speeds: choose between Low, Medium and High speeds and adjust the airflow intensity according to your preferences.

EnergySilence Aero 5200 Light

Design

Designer ceiling fan with 21-W DC motor, 50-W LED light, remote control, 3 blades, 6 speeds, winter-summer mode and timer up to 8 hours.

FEATURES:

Light ring: it has a light ring that surrounds the fan, creating an aesthetic and dynamic atmosphere.

21 W DC motor: it has a DC motor with a power of 21 W that increases the air flow and the feeling of freshness, with maximum reliability and durability.

Large 40-inch diameter (100 cm) that increases the fresh air coverage in the room, with a built-in 50 W LED light making it a practical hybrid appliance. Enjoy light and a perfect environment at home in the most economical and effective way.

Remote control: convenient and simple control thanks to its remote control, from which you can select the fan operation.

Programmable timer that allows you to select 1, 2, 4 and up to 8 hours of operation, after which the fan will switch off automatically.

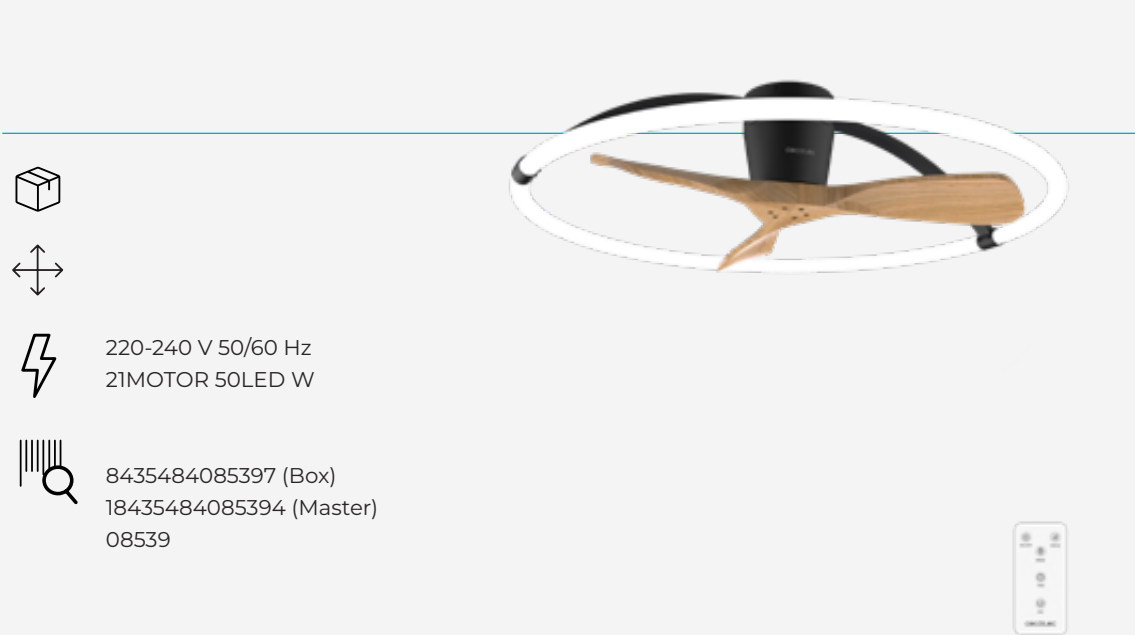

6 speeds available: choose between its 6 operating speeds, adapting the intensity of the air flow to your needs.

3 blades: system consisting of 3 totally innovative and aerodynamic blades, designed to maximise airflow and ensure a constant flow of fresh air.

Winter/summer function: the fan is equipped with a motor rotation reversal system for summer/winter function. In one sense, it generates a pleasant breeze to fight the heat. On the contrary, it pushes the warm air concentrated in the ceiling down to the floor, perfect for complementing your heating system. You can control these functions conveniently with the remote control.

COMPOSITION:

Fan body, remote control, assembly kit, instruction manual

220-240 V 50/60 Hz

EnergySilence Aero 5290 Natural

40-W and 52" ceiling fan with built-in DC motor, 18-W LED light, timer adjustable between 1/2/4 and 8 hours, winter-summer mode, 6 available speeds and 5 blades.

FEATURES:

Designer ceiling fan: with blades covered in braided rattan, it gives the room functionality and originality at the same time.
40 W DC motor: provides direct current and improves the operation of the fan, increasing its efficiency and generating less power consumption. Moreover, it works silently.
52 inches: diameter of 132 cm which allows a large coverage of fresh air in the room where the fan is located.
Remote control: convenient and simple control that allows you to select the operation of both the fan and its 18 W LED light.
Programmable timer: allows you to set the fan operating time from 1 to 8 hours.
6 speeds: adapt air flow intensity to your needs.
5 innovative, aerodynamic blades: designed to maximise airflow and ensure a constant flow of fresh air.
Summer and winter mode: the fan is equipped with a motor reversing system that makes it suitable for year-round use. In winter it blows the warm air concentrated in the ceiling and in summer it generates an instant fresh air flow.

COMPOSITION:

Fan, instruction manual, assembly kit, remote control, remote control batteries (2*AAA)

EnergySilence LampAero 600 / 610 / 620 Natural Design

EnergySilence LampAero 600 Natural Design

Designer ceiling fan with DC motor, 20 W, 45-W LED light, 5 blades of 17 inches, remote control, 3 speeds, 3 shades of light available, timer and winter/summer mode.

FEATURES:

- Natural design: the fan has a wicker lampshade that covers it, creating an aesthetic and natural atmosphere.
- High power: the high-performance DC motor with 20 W increases the airflow and the cooling sensation with maximum reliability and durability.
- LED lamp: the fan is equipped with a built-in LED light that provides the perfect light and atmosphere in your home in the most effective and affordable way. Select any of its 3 available tones.
- Convenient operation thanks to its remote control through which you can select the operation of the fan.
- Timer: select between 1, 2, 4 and up to 8 hours of operation. Once the selected time has elapsed, the fan will switch off automatically.
- 3 operating speeds: choose between Low, Medium and High speeds and adjust the airflow intensity according to your preferences.
- 5 aerodynamic blades: the blades are designed to maximise airflow and ensure a constant flow of fresh air.
- Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

COMPOSITION:

Fan body, remote control, assembly kit, instruction manual

200-240 V 50 Hz

EnergySilence Aero 5400 Aqua Connected Ceiling fan

40 W 52" ceiling fan with remote control, Wi-Fi, IP44 protection, 6 speeds, 3 blades, winter-summer mode, and timer up to 8 hours.

FEATURES:

Great power of 40 W, with high-performance DC motor for an increased airflow and feeling of freshness, with maximum reliability and durability. Its DC motor improves the fan's operating, increasing efficiency and consuming less energy. Moreover, its operating is extremely silent. Wide diameter, 52" (132 cm) that increases the fresh air coverage area. System composed of 3 totally innovating and aerodynamic blades, designed to maximise air flow and ensure constant fresh-air flow.

Its Wi-Fi control through smartphone allows setting different fan configurations and controlling it through its remote control. In addition, it includes a remote control which makes controlling the fan even easier and more convenient.

Perfect for outdoor use, the fan is IP44-certified, making it possible to use it both indoors and outdoors.

Its timer allows selecting the desired operating time, 1, 2, 4, or 8 hours, and then the device turns automatically off.

Choose from its 6 operating speeds in order to adjust the air flow intensity to your needs. The fan includes a motor-turnaround system in order to operate the summer and winter function. The blades direction is selected by means of a switch, in one direction during summer in order to produce a pleasant breeze and in the opposite during winter, to push hot air stuck in the ceiling towards the floor. Perfect to complement your heating system.

EnergySilence Aero 5285 Sun WhiteTransparent

40 W 52" ceiling fan with remote control, Wi-Fi, IP44 protection, 6 speeds, 3 blades, winter-summer mode, and timer up to 8 hours.

- FEATURES:**
- 40 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
 - 52 inches: large diameter of 132 cm which allows a large coverage of fresh air in the room where the fan is placed.
 - Wi-Fi control: by using a smartphone, you can select the various fan operating settings and control the fan remotely. In addition, it includes a remote control which makes controlling the fan even easier and more convenient.
 - IP44 protection: perfect for outdoor use, the fan has an IP44 certification which shows its high protection so the fan can be used both indoors and outdoors.
 - Timer up to 8 hours: choose between 1, 2, 4 or 8 hours of operation. After this, the fan will stop automatically.
 - 6 speeds available: choose between its 6 operating speeds, adapting the intensity of the air flow to your needs.
 - Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

40 W 52" ceiling fan with remote control, Wi-Fi, IP44 protection, 6 speeds, 3 blades, winter-summer mode, and timer up to 8 hours.

- FEATURES:**
- 40 W DC motor: provides high performance, increased airflow and cooling sensation, with maximum reliability and durability. In addition, it generates less power consumption and operates quietly.
 - Large diameter of 52 inches (132 cm) which increases the fresh air coverage in the room.
 - System composed of 3 innovative and aerodynamic blades, designed to maximise air flow and ensure constant fresh air with an elegant wooden design.
 - App Control and remote control: allows you to select the different fan operating settings and control the fan remotely. In addition, it includes a remote control which makes controlling the fan even easier and more convenient.
 - IP44 protection: protection against water, which makes it perfect for outdoor use.
 - Programmable timer: allows you to set the fan operating time from 1 to 8 hours.
 - 3 aerodynamic blades: innovative wooden design provides a constant flow of fresh air.
 - 6 speeds: adapt air flow intensity to your needs.
 - Summer and winter mode: the fan is equipped with a motor reversing system that makes it suitable for year-round use. In winter it blows the warm air concentrated in the ceiling and in summer it generates an instant fresh air flow.

EnergySilence Aero 4280 Invisible

EnergySilence Aero 4280 Invisible White ceiling fan

Ceiling fan with retractable blades and white finish, LED light with 3 intensity levels and 42" diameter. 8h timer, winter - summer function, remote control and 3 blades.

FEATURES:

The ceiling fan has been designed to form a mixed unit that ensures elegant illumination without diminishing the efficiency of air distribution. The blades are retractable, so you can hide them when desired, unlike other fans. The ceiling fan features an elegant and minimalist ceiling lamp that generates a wide range of light. You can choose from 3 different tones: warm, neutral and cool. Its diameter with the blades unfolded is 42 inches (106 cm), an exceptional size to place it in any room. The fan features an innovative rotation inversion system which allows you to use it throughout the year. In summer you can enjoy a nice breeze and in winter you can lower the hot air that accumulates in the upper part of the room. Your heating best ally. Great power, 40 W and high-performance copper motor that increases air flow and freshness feeling, offering maximum liability and durability. Choose from its 6 operating speed options in order to adjust the air flow intensity to your needs. You can control all the functions easily and conveniently thanks to its remote control. The fan features a timer which allows you to select 1, 2, 4 or 8 hours of non-stop operation. The fan will turn off once the selected time has elapsed.

EnergySilence Aero 3600 Invisible Style

EnergySilence Aero 3600 Invisible Metallic Style

Designer ceiling fan with DC motor, 25 W, built-in light, 3 retractable blades, 36 inches, remote control, 3 speeds, timer and winter/summer mode.

FEATURES:

Black grille lampshade: the fan has a black grille lampshade that covers the fan, creating an aesthetic and elegant atmosphere.

25 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.

36 inches: large diameter that allows a large coverage of fresh air in the room where the fan is located. It also has a built-in LED lamp that provides the perfect light and atmosphere for your home.

Remote control: convenient and simple control thanks to its remote control, with which you can easily operate the fan.

Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time. Once the selected time has elapsed, it switches off automatically.

6 speeds available: choose between its 6 operating speeds, adapting the intensity of the air flow to your needs.

3 blades: system consisting of 3 totally innovative and aerodynamic retractable blades, created to maximise airflow and ensure a constant flow of fresh air without compromising on design.

Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

EnergySilence Aero 7000 Light Pro

35-W and 70" ceiling fan with 36-W LED light, 6 speed settings, 9 blades and winter-summer mode.

FEATURES:

50 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.
Large diameter: the fan's 70 inch diameter (178 cm) increases the fresh air coverage in the room.
Convenient operation thanks to its remote control through which you can select the operation of the fan.
Timer: select between 1, 4 and up to 8 hours of operation. Once the selected time has elapsed, the fan will switch off automatically.
6 operating speeds: adjust the intensity of the airflow according to your preferences.
9 aerodynamic blades: the blades are designed to maximise airflow and ensure a constant flow of fresh air.
Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.
Adjustable height: the fan is fully adjustable with two tubes for height adjustment of 39.5 or 52 cm to suit every user and situation.

COMPOSITION:

Fan, instruction manual, assembly kit, remote control, remote control batteries (2*AAA)

EnergySilence Aero 7200 Pro

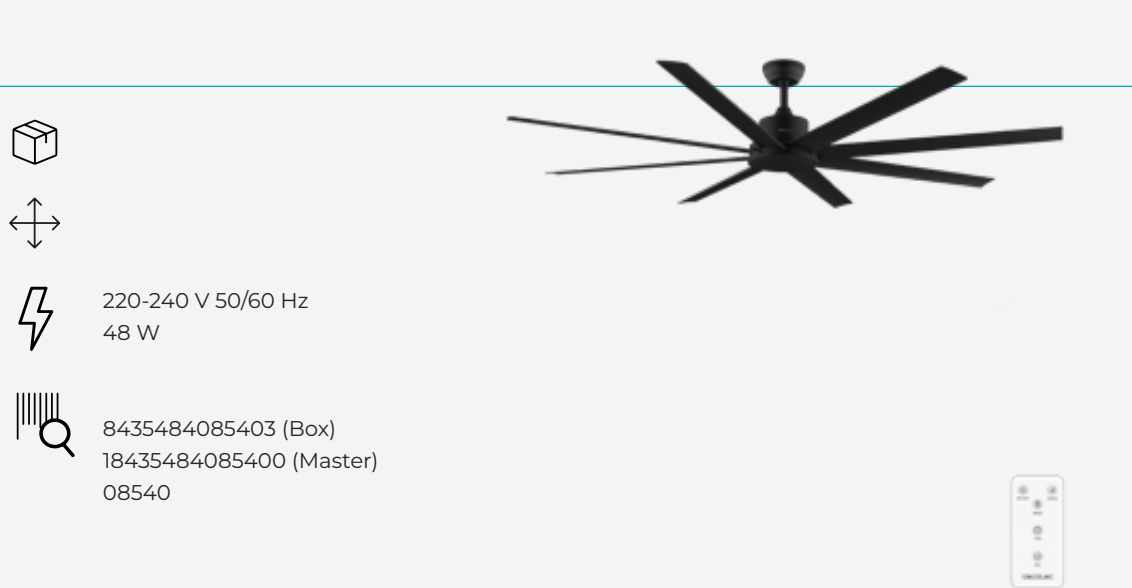

Ceiling fan with 48 W DC motor, 72", remote control, 8 blades, 6 speeds, winter/summer mode and timer up to 8 hours.

FEATURES:

48 W DC motor: high power and high performance that increases the air flow and the feeling of freshness.
72 inches: large diameter of 183 cm which allows a large coverage of fresh air in the room where the fan is placed.
Remote control: convenient and simple control thanks to its remote control, with which you can easily operate the fan.
Timer: select between 1, 2, 4 and up to 8 hours of operation. After this time, the fan will switch off.
6 speeds: you can choose between several operating speeds, adapting the intensity of the air flow to your needs.
8 blades: system consisting of 8 totally innovative and aerodynamic blades, designed to maximise airflow and ensure a constant flow of fresh air.
Winter/summer function: the fan is equipped with a motor rotation reversal system for summer/winter function. In one sense, it generates a pleasant breeze to fight the heat. On the contrary, it pushes the warm air concentrated in the ceiling down to the floor, perfect for complementing your heating system.
Elegant design: the design of the large blades follows an elegant line to fit in perfectly with the decoration of the room.

COMPOSITION:

Fan body, remote control, assembly kit, instruction manual

EnergySilence Aero 10000 Pro

90-W and 100” ceiling fan with DC motor, remote control, adjustable height, programmable timer up to 8 hours, 6 blades, 6 speeds and winter-summer mode.

FEATURES:

90 W DC motor: a direct current motor that improves the fan's operation, increasing its efficiency and generating less electricity consumption. Moreover, it works silently.

100 inches: with a large diameter of 254 cm, which allows a large coverage of fresh air in the room where the fan is placed.

Remote control: control the fan remotely thanks to its remote control, with which you can easily manage the fan's operation.

Programmable timer: programme the fan for the time you want in a range of 1, 2, 4 and up to 8 hours. Afterwards, the fan will switch off automatically.

6 speeds available: adapt the intensity of the air flow to your needs.

6 aerodynamic blades: designed to maximise airflow and ensure a constant flow of fresh air.

Winter/summer: the fan is equipped with a motor rotation reversal system for summer/winter function. Rotating in one direction, you can enjoy a pleasant breeze in summer and, in the opposite direction, the fan will blow warm air to the floor and complement your heating system in winter.

Adjustable height: the fan is fully adjustable with two tubes for height adjustment of 37.5 or 50 cm to suit every user and situation.

EnergySilence 490 Freshessence

Mist fan with 90 W, 2.8 l water tank, 5 blades, remote control, timer and oscillation function.

FEATURES:

High power of 90 W: facilitates the ventilation of the room in which the fan is placed.
Its large tank, 2.8 l, achieves a great range of water mist allowing you to enjoy the best environments the whole day.
Remote control: conveniently control the fan from a distance and check the selected settings with its LED indicator light.
Automatic oscillation that facilitates the distribution of fresh air in the room where it's located.
Programmable timer: select the desired operating time up to 7.5 hours.
3 speeds: regulate the intensity of the air flow according to the needs of each moment (Low, Medium and High).
3 operating modes: Normal, Natural, Sleep to always adapt to your needs.
The 16-inch fan has a large diameter of 40 cm that boosts the airflow output which, together with its 5 blades, collaborate during the ventilation process and allow for a more homogeneous distribution of the air.

EnergySilence 590 Freshessence mist fan

Mist fan with 90 W, 16", 3 l water tank, 5 blades, 3 speeds, remote control, 2 h timer, oscillation function easy to use, wheels and maximum safety.

FEATURES:

FreshEssence: Mist technology that refreshes environment with water microparticles.
EnergySilence Technology: Creates an instant deep feeling of fresh air. Completely silent.
AirFlow5: technology that consists of 5 large blades (40 cm) to ensure maximum and efficient fresh-air flow. Enjoy maximum freshness and minimum consumption.
3L Capacity: enjoy up to 12-hour water steam range thanks to its 3-litre tank.
Copper Engine: exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability.
3Speed Function: Choose between 3 operating speeds (low-Sleep, medium-Eco and high-Turbo).
Adjustable Mist: adapt steam water separately and create different environments at home or in your terrace.
CoolTimer: programmable timer of up to 120 minutes, time after which the fan turns off automatically.
Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Security System: Integral security system composed of a safety grid that prevents access to the blades.
Blades made of semisoft AS material, for greater security.
Large solid and stable base that ensures maximum stability.
Minimal Design: Well-cared minimalist design, with elegant lines that adapt to your home.
Health&Safety: The fan complies with environmental safety and protection current legislation.
Easy to move: Easy to move and to store thanks to its casters.

EnergySilence 690

Freshessence mist fan

5-blade digital mist fan, 90 W, 3-litre capacity, copper motor.

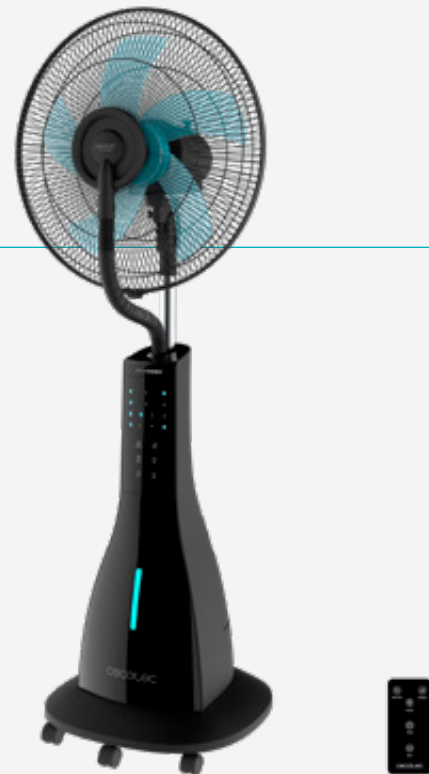

FEATURES:

FreshEssence: Mist technology that refreshes environment with water microparticles.
EnergySilence Technology: Creates an instant deep feeling of fresh air with maximum silence and comfort.
AirFlow5: Technology that consists of 5 large blades (40 cm) to ensure maximum fresh-air flow.
Smart Control: Smart control thanks to its remote control and its LCD display. Intuitive and easy to use.
3L Capacity: enjoy up to 12-hour water steam range thanks to its 3-litre tank.
Copper Engine: Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. It incorporates ThermoSafe security system to lengthen the fan's service life and to avoid incidents and faults.
Adjustable Mist: adapt steam water separately and create different environments at home or in your terrace.
3Speed Function: Choose between 3 operating speeds (low-Sleep, medium-Eco and high-Turbo).
3Modes Pro: adapts air modes to your needs (TURBO, SLEEP and ECO).
CoolTimer: programmable timer of up to 7.5 hours, time after which the fan turns off automatically.
Rotate Wind: Blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Security System: Integral security system composed of a safety grid, blades made of AS semisoft material and a solid and stable base that ensures complete stability.
Minimal Design: Well-cared minimalist design, with elegant lines that adapt to your home.
Health&Safety: The fan complies with environmental safety and protection current legislation.
Easy to move: Easy to move and to store thanks to its casters.

EnergySilence 790

Freshessence Ionic mist fan

5-blade digital mist fan, copper motor, ionising function, aroma diffuser and anti-mosquito function.

FEATURES:

Mist technology FreshEssence, refreshes the environment with water microparticles. Enjoy a pleasant environment with the best smell and maximum comfort.
EnergySilence Technology system that creates an instant deep feeling of fresh air with maximum silence and comfort.
AirFlow5 technology that consists of 5 great-diameter blades to ensure maximum and efficient fresh air flow.
Smart Control, smart system thanks to its remote control and its LCD display. Intuitive and easy to use.
Exclusive motor made of 100 % high-efficiency copper, completely reliable and maximum durability. Lengthens the fan's service life and avoids incidents and faults thanks to its ThermoSafe security system.
Ionizing function that produces negative ions to remove dust particles from the environment.
Enjoy a nice environment with pleasant scent thanks to its PureAroma system that allows pouring aromatic oils into a specific tank. Aromatic oils not included.
Anti-mosquito function. Tablets not included.
3 speeds to adjust air flow intensity (low, Night, medium-Normal and high-Turbo).
Its large tank, 3.1 L, achieves a 12-hour range of water mist allowing you to enjoy the best environments the whole day. The tank also includes an indicator that lights up when it is running out of water.
Adjustable Mist system with 3 steam speeds to adapt steam water separately and create different environments at home or in your terrace.
Programmable timer that can be scheduled up to 12 hours, time after which the fan turns automatically off for maximum comfort and to save energy.
Rotate Wind blade-oscillation mode to create a greater air flow angle and to offer a wider freshness area.
Total Control system that allows adjusting the air flow's angle of incidence.
Security System: Integral security system composed of a safety grid that prevents access to the blades.
Blades made of semisoft AS material, for greater security. Large solid and stable base that ensures maximum stability.

EnergySilence 500 DeskChill Smart

500 ml desktop cooler, touch control, digital display and timer.

FEATURES:

Instant freshness: it manages to generate freshness quickly and, with its 500 ml tank capacity, allows for prolonged use. The cooler the water, the greater the freshness.
Touch control for greater comfort when selecting the air cooler settings. In addition, you can see all selected settings on the display.
3 speeds: it has 3 speeds that allow you to regulate the intensity of the air flow according to the needs of each moment.
Programmable timer: programme up to a maximum of 8 hours, allowing you to select the desired operating time.
Auto off: after selecting the timer operating hours, the air conditioner will switch off automatically.
LED light: the air cooler has a LED light with 7 selectable colours.
It also has a handle in its top part, for easy transportation from one room to another.
This cooler comes with a filling funnel which simplifies the task of filling the water tank to make the process more convenient and efficient.

COMPOSITION:

Air cooler, instruction manual, filling duct

EnergySilence 600 DeskChill Rotate

600 ml desktop cooler, touch control, digital display, oscillation function and timer.

FEATURES:

It generates freshness quickly and for a long time thanks to its 600 ml capacity tank. The cooler the water, the greater the freshness.
Touch control for greater comfort when selecting the air cooler settings. In addition, you can see all selected settings on the display.
4 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
70° oscillation to direct the air flow in as many directions as desired.
Programmable timer up to a maximum of 6 hours, which enables you to set the desired operating time.
Auto off: after selecting the timer operating hours, the air cooler will switch off automatically.
LED light: the air cooler has a LED light with 7 selectable colours.
It also has a handle in its top part for easy transportation from one room to another.

COMPOSITION:

Air cooler, instruction manual

EnergySilence 600 DeskChill Smart Rotate

300 ml desktop cooler, touch control, digital display, oscillation function and timer.

FEATURES:

It generates freshness quickly and for a long time thanks to its 300 ml capacity tank. The cooler the water, the greater the freshness.
Touch control for greater comfort when selecting the air cooler settings. In addition, you can see all selected settings on the display.
4 speeds: allow you to regulate the intensity of the air flow according to your needs at any given moment.
75° oscillation to direct the air flow in as many directions as desired.
Programmable timer up to a maximum of 8 hours, which enables you to set the desired operating time.
Auto off: after selecting the timer operating hours, the air cooler will switch off automatically.
LED light: the air cooler has a LED light with 7 selectable colours.
It also has a handle in its top part for easy transportation from one room to another.

EnergySilence 3500 Cool Compact

65 W evaporative cooler, 3.5 litre tank capacity, 3 speeds and oscillation function.

FEATURES:

Its 3.5-litre tanks allows operating it for long sessions.
65 W, to generate instant freshness.
Its simple operation allows convenient control of the cooler and quick and intuitive selection of its operation.
The 3 speed options allow you to adjust the air flow intensity according to your needs and to the moment.
70° automatic oscillation for an optimum air distribution around the room.
Compact design.
Its design features multi-directional wheels so you can effortlessly move it from room to room.
Together with the cooler, 2 ice coolers are also included to lower the water temperature, and thus the air flow.

COMPOSITION:

Cooler, instruction manual, coolers, wheels

EnergySilence 3500 Cool Compact Smart

65 W evaporative cooler, 3.5 litre tank capacity, touch and remote control, 3 speeds, 12 h timer and oscillation function.

FEATURES:

Its 3.5-litre tanks allows operating it for long sessions.
65 W, to generate instant freshness.
Its top touch control panel allows controlling its modes and functions simple and easily. In addition, it has a remote control to control the cooler from anywhere without the need to get close to it.
The 3 speed options and 2 operating modes allow you to adjust the air flow intensity according to your needs and to the moment.
70° automatic oscillation for an optimum air distribution around the room.
Programmable timer up to a maximum of 12 hours, which enables you to set the desired operating time and the time at which you want the fan to turn automatically off.
Compact design.
Together with the cooler, 2 ice coolers are also included to lower the water temperature, and thus the air flow.

EnergySilence 2000 SkyCool

Tower evaporative cooler, 3 l capacity, 60 W and 3 speeds with oscillation function.

FEATURES:

- 60 W: high power to generate freshness quickly.
- 3 litres: large capacity for prolonged operation. The cooler the water, the greater the freshness.
- 3 speeds: Low, Medium and High, so that you can adapt their use according to your needs at any given moment.
- 41 inches that make it possible for the airflow to be greater, thus assisting in the process of cooling the environment.
- Aroma diffuser: the air cooler is compatible with essential oils and therefore functions as an aroma diffuser.
- 50° oscillation to direct the air flow in as many directions as desired.
- Easy to use: its manual control makes it possible to select the desired speed and oscillation settings easily.
- It also has a handle in its top part for easy transportation from one room to another.

COMPOSITION:

EnergySilence 2000 Cool Tower air cooler

Tower evaporative cooler, 2-litre capacity, 60 W and 3 speeds with oscillation function.

FEATURES:

- 60 W, to generate instant freshness.
- Its 2-litre tanks allows operating it for long sessions. The cooler the water, the greater the freshness.
- Its 3 speeds, Low, Medium and High, allow adapting it to every moment's requirements.
- Its 39", equivalent to 1 metre, allows the airflow to be greater, thus assisting in the process of cooling the environment.
- The removable tank allows moving it easily in order to refill it when necessary, and operating it again.
- 60° oscillation to direct the air flow in as many directions as desired. Air flow can also be set steady in a fixed position.
- The evaporative cooler is equipped with a rear air filter capable of retaining large particles contained in the air.
- It also has a handle in its top part, for easy transportation from one room to another.
- Its simple manual control allows easy setting of speed level and oscillation grade.
- It is highly stable thanks to its base.
- Its 800 m³/h great air flow rate is capable of efficiently conditioning any room.
- With only 59 dB, it is extremely silent and therefore, does not interrupt your day to day.
- The evaporative cooler comes with 2 ice coolers that decrease water temperature, and consequently, the air flow's temperature.

EnergySilence 2000 Cool Tower

Smart air cooler

Tower evaporative cooler, 2-litre capacity, 60 W and 3 speeds with oscillation function, timer, touch and LED display. Remote control.

FEATURES:

60 W, to generate instant freshness.
Its 2-litre tanks allows operating it for long sessions. The cooler the water, the greater the freshness.
Its remote control allows complete control of the cooling process for effortless use and greater comfort.
Its LED display shows the room temperature and the selected settings thanks to its icons.
The tower evaporative cooler has a 8-hours timer to select the desired operating time. When the time is over, the device will automatically switch off.
Its 3 speeds, Low, Medium and High, allow adapting it to every moment's requirements.
3 modes: Normal; Sleep, to reduce the decibels at a minimum; and Eco, to reduce energy consumption.
Its 39", equivalent to 1 metre, allows the airflow to be greater, thus assisting in the process of cooling the environment.
Touch control for greater comfort when selecting the climate control settings.
The device has a thermometer, thanks to which the temperature of the home can be shown on the LED display in real time.
The removable tank allows moving it easily in order to refill it when necessary, and operating it again.
60° oscillation to direct the air flow in as many directions as desired. Air flow can also be set steady in a fixed position.
The evaporative cooler is equipped with a rear air filter capable of retaining large particles contained in the air.
It also has a handle in its top part, for easy transportation from one room to another.
Its simple manual control allows easy setting of speed level and oscillation grade.
It is highly stable thanks to its base.
Its 800 m³/h great air flow rate is capable of efficiently conditioning any room.

EnergySilence 5000 Cool Wave

Designer evaporative cooler, 5 l capacity, 28 W DC motor, 12 speeds with oscillation function.

FEATURES:

28 W of power: it manages to generate freshness quickly with a DC motor that makes it much more efficient.
It generates freshness quickly and for a long time thanks to its 5 l capacity tank. The cooler the water, the greater the freshness.
Thanks to the remote control, you can conveniently control all the functions of the air cooler and, thanks to the LED display, you can see the selected functions.
The air cooler can also be set manually through its touch panel, and you can also see the settings on its display.
12 speeds: allow you to regulate the intensity of the air flow according to your needs and those of your home.
3 modes: choose between Normal, Natural and Sleep modes and regulate the intensity of the air flow according to your needs.
Programmable timer up to a maximum of 9 hours, which enables you to set the desired operating time.
360° automatic oscillation for an optimum fresh air distribution around the room.

EnergySilence 5500 Pure Tech evaporative cooler

3-in-1 evaporative cooler. Cooling, ioniser, and fan function. 12-litre capacity. 3 speeds. Remote control. LCD display. 500 m³/h air flow. 12-hour timer.

FEATURES:

ClimaCare 3 in 1: 3-in-1 evaporative cooler with cooling, ioniser, and fan function.
AirFlow 500: Great air flow of up to 500 m³/h to refrigerate rooms in the fastest and more uniform way.
12 L Capacity Pro: great-capacity water tank with professional capacity of 12 L for a prolonged use.
IonFuncion: includes ionizer function that reestablishes natural balance and purifies air through positive-ion emission.
SmartControl: includes remote control to ensure maximum comfort, control it easily from the sofa or bed.
TouchControl: touch-control display with an advanced design for an easy handling.
EcoMode: Eco mode for more efficient consumption and maximum savings on electricity bills.
SleepMode: specially designed for relaxing moments and night hours.
3 Speed Function: select the speed and the ideal intensity at each moment with its 3 adjustable speeds.
Auto-swing function: Automatic inside-blade oscillation of up to 120° to offer a greater aeration angle and to maximise the freshness zone.
Humidify Technology: humidifies the environment to improve air quality and allows using fragrances in the water.
TimeControl: LCD display, very easy to use with up to 12-hour timer to select the desired operating time.
Waterfull indicator: water indicator that warns when the tank is empty to ensure correct operation of the product.
Icepack: includes water coolers to improve the cooling function.
EnergySave: high energetic efficiency with low consumption, 80 W in cooling mode.
UltraSilence System: silent system with a minimum noise level of < 65 dB.
AirPure: includes an elaborate dust and particles filtering system, in order to breathe cleaner air, without pollen, dust mites, virus or bacteria.
Plug&Play portable: portable for a comfortable and fast transportation.

EnergySilence 6500 Pure Tech evaporative cooler

Evaporative cooler, heat and cool, up to 500 m³/h air flow with remote control.

FEATURES:

4-in-1 ClimaCare: 4-in-1 evaporative cooler with cool, heat, ionizer and fan function.
IonFuncion: includes ionizer function that reestablishes natural balance and purifies air through positive-ion emission.
SmartMode: normal-use mode that optimizes operating of each function.
EcoMode: Ideal for a more efficient consumption.
SleepMode: specially designed for relaxing moments and night hours.
Smart Control: Greater adaptability thanks to its 3 intensity levels for the heat function and 2 speed levels for fan function.
AirFlow 500: great air flow of up to 500 m³/h to cool 15-20 m² rooms in the fastest and most uniform way.
Auto-swing function: Automatic blade oscillation of up to 120° to offer a greater aeration angle and to maximise the freshness zone.
SmartCare System: Moisturises environment to improve air quality and allows using repellents and essential oils in water.
Easy Control: system that works with LED display, user-friendly, with 12-hour timer. Includes remote control for an easy and comfortable comfort.
WaterControl: includes IcePack and a built-in tank with capacity for 12 litres and a control front window.
EnergySave: greater energy efficiency with low consumption, 80 W in cooling mode.
UltraSilence System: minimum noise level, more silent than other devices in the market.
AirPure: includes an elaborate dust and particles filtering system, in order to breathe cleaner air, without pollen, dust mites, virus or bacteria.
Easy to move: Includes multidirectional wheels to allow an easy transport.

ForceClima 7100 Soundless Portable air conditioner

7000 BTU portable air conditioner with remote control.

FEATURES:

Portable air conditioner with great cooling capacity of 7000 BTU. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. Soundless technology. This system provides quieter operation and also reduces possible vibrations to create greater comfort. It has remote control on order for you to comfortably control the device from anywhere in your house. Adapt and set the desired degrees in order to enjoy the perfect temperature in its 20-m2 coverage area. The LED display shows all possible settings and indicates the ones being used at every moment, allowing for an easier control of the air conditioner. The air conditioner has 4 different operating modes: Fan, Cool, Dehumidification and Night. Its 2 speed settings allow adapting its operation to different moments and situations. Choose between Low and High. With its Dehumidification mode it is capable of absorbing a maximum of 20L/day, resulting in a much healthier atmosphere. The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off. The air conditioners uses R-290 gas, which is Eco-friendly. Its 780 W allows the air conditioner to cover a 20-m2 and to reach the desired temperature in a short period of time. The air conditioner has a water drainage tube that helps keep it running at every moment. The air filter is capable of stopping the larger particles in the air, improving air quality. Its 360° multi-directional wheels and its handle allow carrying and moving it from room to room easy and effortlessly. Includes window assembly kit.

Its energy class A guarantees moderate energy consumption, effective and efficient operation. The air conditioners uses R-290 gas, which is Eco-friendly. Its 1340 W allows the air conditioner to cover a 28 m² and to reach the desired temperature in a short period of time. The air conditioner has a water drainage tube that helps keep it running at every moment. The air filter is capable of stopping the larger particles in the air, improving air quality. Its 360° multi-directional wheels and a handle.

ForceClima 12650 Style Heating

12000 BTU design portable air conditioner with heat pump for year-round use and with remote and touch control for total comfort.

FEATURES:

Portable air conditioner with great cooling capacity of 12000 BTU, equivalent to 3000 frigories. Get the desired temperature in the room where you are quickly and efficiently.

Large coverage area: adapts and modifies the room temperature by up to 28 m2.

Air conditioning heat pump: use it also in winter in order to increase the temperature of the room in which it is placed.

Remote control included: control the air conditioner conveniently from any place. In addition, its touch control panel allows you to control the operation of the air conditioner conveniently and easily.

LED display: check all possible settings at a glance on its LED display.

5 operating modes: Fan, Cool, Heat, Dehumidification and Sleep.

2 air conditioning speeds that allow it to adapt its operation to any situation. You can choose between Low speed and High speed.

Dehumidification mode: capable of capturing up to 29 litres per day for a healthier home environment.

Timer: programme the operating time of the air conditioner for a maximum of 24 hours. After the time has elapsed, the air conditioner will switch itself off.

R-290 gas: environmentally friendly and low polluting.

360° multidirectional wheels: move the air conditioner from one room to another easily, comfortably and with little effort.

Accessories: window installation kit included.

COMPOSITION:

Portable air conditioner, instruction manual, remote control, window assembly kit, wheels, drain hose

ForceClima 12800 Soundless Heating Connected portable air conditioner

Portable air conditioner, 12000 BTU with heating pump and Wi-Fi control. Includes remote control.

FEATURES:

Portable air conditioner with great cooling capacity of 12000 BTU. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. Soundless technology. This system provides quieter operation and also reduces possible vibrations to create greater comfort. The air conditioner's heat pump allows using it during winter to heat rooms. You can set the device as desired from your Smartphone through Wi-Fi connection, no matter where you are. Adapt and set the desired degrees in order to enjoy the perfect temperature throughout its 28-m2 coverage area. The LED display shows all possible settings and indicates the ones being used at every moment, allowing for an easier control of the air conditioner. The air conditioner has 5 different operating modes: Fan, Cool, Heat, Dehumidification and Night. Its 3 speed settings allow adapting it to different moments and situations. Choose between low, medium, or high. With its dehumidification mode it is capable of absorbing up to 26L/day, resulting in a much healthier atmosphere. The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off. The air conditioner also includes oscillation function that helps air being spread in all directions, improving the conditioning of the room. 3 security systems. Anti-frost security (the device turns off when temperature reaches 0 °C), overflow security system (the device turns off and the full tank red indicator light lights up when the tank is full) and security compressor that lengthens the lifespan (it takes 3 minutes to turn the device progressively off, avoiding sudden turn-off). Its energy class A guarantees moderate energy consumption, effective and efficient operation. The air conditioners uses R-290 gas, which is Eco-friendly. Its 1340 W allows the air conditioner to cover a 28-m2 and to reach the desired temperature in a short period of time.

Windowclima 9000 Inverter

9000 BTU Inverter window air conditioner with remote control, touch control and LED display.

FEATURES:

Innovative design with simple, space-saving window installation, uncomplicated installation, convenient, elegant and revolutionary.

Window air conditioner with a large cooling capacity of 9000 BTU equivalent to 2250 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operation to a steady speed and temperature, increasing its lifespan.

Its large coverage area of 22 m² makes it possible to adapt and modify the temperature of the room to the desired degree. Its high airflow rate of 390 m³/h provides a large flow of cool air to achieve the desired temperature at home.

Remote control included: control the air conditioner conveniently from any place. In addition, its touch control panel allows you to control the operation of the air conditioner conveniently and easily. LED display: check all possible settings at a glance on its LED display.

Its 5 operating modes (automatic, cooling, fan, dehumidification and sleep) allow adapting it to every moment and season of the year.

The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off.

Dehumidification mode: capable of capturing up to 28.8 litres per day for a healthier home environment.

R-290 gas: environmentally friendly and low polluting.

The air conditioner features a moving and oscillating flap that allows the air direction to be selected and assists in the air distribution process.

Air conditioner couplings

Compatible with:
Sliding windows.
Oscillating windows.
Sliding doors.

*Technologies and performance may vary depending on the model.

Insulation cover 163x35

Insulated sliding window covering 163 x 35 cm for portable air conditioners.

FEATURES:

Ideal for your windows: the 163 x 35 cm dimensions of the insulation cover are ideal for your home's windows.
100% polyester: made entirely of polyester for strength and durability.
Insulates from the outside: prevents the return of hot air and humidity from the outside.
Perfect seal: includes zip and tape to ensure a tight seal and prevent the entry of outside elements.

Split air conditioners

Inverter system.

Refrigerant: 24000 BTU max.

Cooling capacity of up to 45 m².

Speeds: 8.

App and remote control.

Timer.

Dehumidifier: 43.2 L/day max.

AirClima 9000 Smartfresh Split air conditioner

9000-BTU split air conditioner with heat pump, remote control, and LED display. Remote control.

FEATURES:

Split air conditioner with great cooling capacity, 9000 BTU, equivalent to 2250 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. The air conditioner's heat pump allows using it during winter to heat rooms. Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operating to a steady speed and temperature, increasing its lifespan. The LED display shows all possible settings and indicates the ones being used at every moment, allowing for an easier control of the air conditioner. Its 5 operating modes (automatic, cooling, fan, heating and dehumidification) allow adapting it to every moment and season of the year. Its 8 air conditioning speeds offer maximum comfort, allowing you to select the desired speed according to the moment and your needs. You can also choose between its 3 operating options: Night (minimum noise), Eco (minimum consumption) and Auto-cleaning. With its Dehumidification mode, it is capable of absorbing up to 24 l/day, resulting in a much healthier atmosphere. Adapt and set the desired degrees in order to enjoy the perfect temperature throughout its 16-m2 coverage area. Its great air flow rate of 4²⁰ m3/h generates a great cold or hot air flow for you to enjoy the perfect temperature at home. The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off. The air conditioning has a removable and washable air filter, which prevents the great majority of dust particles from being released back to the environment. The R32 gas increases effectiveness and the cooling/heating power. It is also environmentally friendly. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The air conditioning features a moving and oscillating flap that allows selecting the direction in which air is released. The energy classification for ventilation is A++, demonstrating its high efficiency during operation. The A+ heating energy class proves its high operating efficiency. Its 2600 W cooling capacity ensures fresh atmospheres. Its 2610 W heating capacity ensures warm atmospheres.

The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The air conditioning features a moving and oscillating flap that allows selecting the direction in which air is released. The lock function is a safety feature which avoids setting from being accidentally changed and protects it from being used by children. The automatic re-start function ensures the air conditioning will continue operating with the previously selected settings after a power cut. The A++ cooling and the A+ heating energy class proves its high operating efficiency. Its 3400 W cooling capacity ensures fresh atmospheres and heating capacity ensures warm atmospheres.

AirClima 12000 Smartfresh Connected Split air conditioner

12000 BTU split air conditioner with heat pump, remote & Wi-Fi control, and LED display.

FEATURES:

Split air conditioner with great cooling capacity, 12000 BTU, equivalent to 3000 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. The air conditioner's heat pump allows using it during winter to heat rooms. Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operating to a steady speed and temperature, increasing its lifespan. You can set the device as desired from your Smartphone through Wi-Fi connection, no matter where you are. The LED display shows all possible settings and indicates the ones being used at every moment, allowing for an easier control of the air conditioner. It has remote control on order for you to comfortably control the device from anywhere in your house. Its 5 operating modes (automatic, cooling, fan, heating and dehumidification) allow adapting it to every moment and season of the year. The timer can be set up to 24 hours. Its 8 air conditioning speeds offer maximum comfort, allowing you to select the desired speed according to the moment and your needs. You can also choose between its 3 operating options: Night (minimum noise), Eco (minimum consumption) and Auto-cleaning. With its Dehumidification mode, it is capable of absorbing up to 28,8 l/day, resulting in a much healthier atmosphere. Adapt and set the desired degrees in order to enjoy the perfect temperature throughout its 22-m² coverage area. Its great air flow rate of 550 m³/h generates a great cold or hot air flow for you to enjoy the perfect temperature at home. The air conditioning has a removable and washable air filter, which prevents the great majority of dust particles from being released back to the environment. The R32 gas increases effectiveness and the cooling/heating power. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The air conditioning features a moving and oscillating flap that allows selecting the direction in which air is released. The energy classification for ventilation is A++, demonstrating its high efficiency during operation. The A+ heating energy class proves its high operating efficiency. Its 3400 W cooling capacity ensures fresh atmospheres. Its 3420 W heating capacity ensures warm atmospheres. This compressor has an IPX4 certificate, meaning it is protected against water (up to 10 litre water jet per minute at great pressure).

AirClima 18000 Smartfresh Split air conditioner

18000-BTU split air conditioner with heat pump, remote control, and LED display.

FEATURES:

Aire acondicionado de split con una gran capacidad de enfriamiento de 18000 BTU equivalentes a 4500 frigorías. Consiguiendo la temperatura deseada de manera rápida y eficaz. Split air conditioner with great cooling capacity, 18000 BTU, equivalent to 4500 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. The air conditioner's heat pump allows using it during winter to heat rooms. Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operating to a steady speed and temperature, increasing its lifespan. The LED display shows all possible settings and indicates the ones being used at every moment, allowing for an easier control of the air conditioner. Its 5 operating modes (automatic, cooling, fan, heating and dehumidification) allow adapting it to every moment and season of the year. Its 8 air conditioning speeds offer maximum comfort, allowing you to select the desired speed according to the moment and your needs. You can also choose between its 3 operating options: Night (minimum noise), Eco (minimum consumption) and Auto-cleaning. The timer can be set up to 24 hours. With its Dehumidification mode, it is capable of absorbing up to 36 l/day, resulting in a much healthier atmosphere. Adapt and set the desired degrees in order to enjoy the perfect temperature throughout its 35-m2 coverage area. Its great air flow rate of 800 m3/h generates a great cold or hot air flow. The air conditioning has a removable and washable air filter, which prevents the great majority of dust particles from being released back to the environment. The R32 gas increases effectiveness and the cooling/heating power. It is also environmentally friendly. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The air conditioning features a moving and oscillating flap that allows selecting the direction in which air is released. The energy classification for ventilation is A++, demonstrating its high efficiency during operation. The A+ heating energy class proves its high operating efficiency. Its 5100 W cooling and heating capacity ensures fresh and warm atmospheres. It includes an outside unit known as compressor, where the motor and gas are kept. This compressor has an IPX4 certificate, meaning it is protected against water (up to 10 litre water jet per minute at great pressure).

AirClima 18000 Multi Connected

Multi split air conditioner consisting of two indoor units, one of 9000 BTU and one of 12000 BTU, plus an outdoor unit of 18000 BTU.

FEATURES:

Split air conditioner with great cooling capacity, 9000 BTU, equivalent to 2250 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively. Split air conditioner with great cooling capacity, 12000 BTU, equivalent to 3000 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

Outdoor unit for multi split air conditioner with a large cooling capacity of 18000 BTU equivalent to 4500 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

The air conditioning heat pump can also be used in winter in order to increase the temperature of the room in which it is located.

Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operation to a steady speed and temperature, increasing its lifespan. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The device can be configured remotely via a Wi-Fi connection, so you have full control of the device on your smartphone from anywhere. The LED display shows all possible settings and highlights which settings are currently in use to provide easy control of the air conditioner. It has a remote control to comfortably control the device from anywhere in your house.

Its 5 operating modes (automatic, cooling, fan, heating and dehumidification) allow adapting it to every moment and season of the year. You can also choose between its 3 operating options: Sleep (minimum noise), Eco (minimum consumption) and Auto-cleaning. Its 8 air conditioning speeds offer maximum comfort, allowing you to select the desired speed according to the moment and your needs. The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off.

For the 9000 BTU unit, it has a coverage area of 16 m² and a large airflow rate of 420 m³/h.

In the case of the 12000 BTU unit, its coverage area is 22 m² which allows the temperature of the room to be adapted and modified to the desired degrees, either to reduce the degrees in summer or to increase them in winter. Its great air flow rate of 550 m³/h generates a great cold or hot air flow for you to enjoy the perfect temperature at home.

The compressor has an IPX4 certification which shows its high protection even against water jets of 10 litres per minute at high pressure.

The R32 gas increases effectiveness and the cooling/heating power. It is also environmentally friendly. The energy classification for ventilation is A++ and the A+ heating energy class proves its high operating efficiency.

AirClima 27000 Multi Connected

Multi split air conditioner consisting of three indoor units, two 9000 BTU and one 12000 BTU, plus an outdoor unit of 27000 BTU.

FEATURES:

Two split air conditioners with a large cooling capacity of 9000 BTU equivalent to 2250 frigories. Thanks to their cooling capacity, they are capable of reaching the desired temperature fast and effectively.

Split air conditioner with great cooling capacity, 12000 BTU, equivalent to 3000 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

Outdoor unit for multi split air conditioner with a large cooling capacity of 27000 BTU equivalent to 6750 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

The air conditioning heat pump can also be used in winter in order to increase the temperature of the room in which it is located.

Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operation to a steady speed and temperature, increasing its lifespan. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the settings selected. The device can be configured remotely via a Wi-Fi connection, so you have full control of the device on your smartphone from anywhere. The LED display shows all possible settings and highlights which settings are currently in use to provide easy control of the air conditioner. It has a remote control to comfortably control the device from anywhere in your house.

Its 5 operating modes (automatic, cooling, fan, heating and dehumidification) allow adapting it to every moment and season of the year. You can also choose between its 3 operating options: Sleep (minimum noise), Eco (minimum consumption) and Auto-cleaning. Its 8 air conditioning speeds offer maximum comfort, allowing you to select the desired speed according to the moment and your needs. The timer can be set up to 24 hours. Set the desired operating time and the device will automatically turn off.

For the 9000 BTU unit, it has a coverage area of 16 m² and a large airflow rate of 420 m³/h.

In the case of the 12000 BTU unit, its coverage area is 22 m² which allows the temperature of the room to be adapted and modified to the desired degrees, either to reduce the degrees in summer or to increase them in winter. AirClima 12000 Cassette Connected

12000-BTU ceiling mounted cassette air conditioner with heat pump, remote control, LED display, and Wi-Fi control. Inverter system. 5 modes and 8 speeds. Daily dehumidification of 28.8 l/day and coverage area of 22 m². Air flow rate 550 m³/h, 24 h timer, air filter, R32 gas, DC motor. Energy classification A + +/A + + and power of 3400 W for cooling and 3420 W for heating.

FEATURES:

Split air conditioner with great cooling capacity, 12000 BTU, equivalent to 3000 frigories. Thanks to its cooling capacity, it is capable of reaching the desired temperature fast and effectively.

The air conditioning heat pump can also be used in winter in order to increase the temperature of the room in which it is located.

Inverter system, which maximises the air conditioning's compressor efficiency as it adjusts its operation to a steady speed and temperature, increasing its lifespan. The DC motor offers maximum air conditioning efficiency as it auto-regulates speed according to the selected settings.
