## CADR

# Clean and healthy air at home

Designed with a high clean-air supply rate\* capable of filtering and cleaning the air in the room they're in, making TotalPure purifiers the best allies for breathing clean air at home.

## FILTERING PROCESS

# Top air purification and efficiency

Enjoy clean air at home thanks to up to 4 filtering processes\* that remove harmful particles through the pre-filter, active-carbon, high-efficiency, and anti-bacterial filters.

\*The clean-air supply rate varies depending on the model.

\*Filtering processes vary depending on the model.

3IN1\*

## Hot or cold, purify air

TotalPure 3in1 purifiers are designed with high heating power and excellent ventilation power to achieve the perfect room temperature. In addition, they eliminate harmful particles while heating or cooling.

\*Available only with TotalPure 3in1 models

PM SENSOR\*

## Improve the quality of the air you breathe

They have a sensor for pollutant concentration and harmful particles. Using the information obtained, the purifier shows the air quality in a 3-colour scale, with blue being the higher quality and red the lower one.

\*Not available with TotalPure 1000 Handy model.

REMOTE CONTROL\*

## Purify air from mobile

Its Wi-Fi control through Smartphone allows setting different configurations of the purifier and checking the measured data.

\*Not available with TotalPure models: 1000 Handy, 1400 Style, and 1600 Style Pro.

# Discover the Total Pure range

# TotalPure 1000 Handy

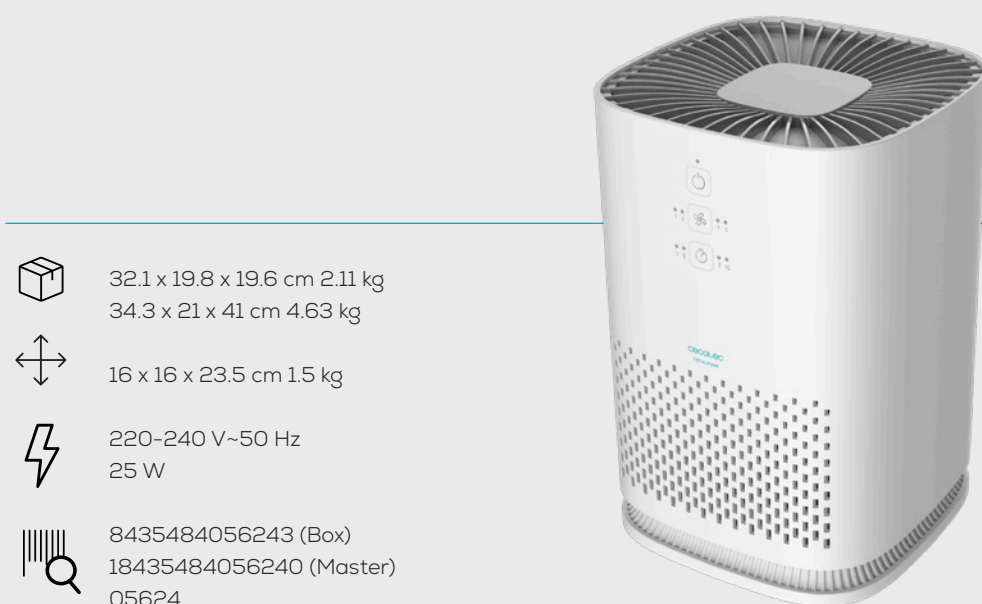

Air purifier with 60 CADR, 3 filtering layers and 25 m³ coverage area.

## FEATURES:

- Great CADR (Clean Air Delivery Rate), capable of filtering and cleaning 60 m³/h of the room's air.
- Its 3 filtering processes through the pre-filter, active carbon filter and high-efficiency filter minimise the amount of toxic or harmful particles present in air.
- Its large coverage area of 25 m³ turns this purifier into the perfect tool to eliminate harmful particles contained in air and to clean your rooms' air.
- Its ioniser is capable of transforming polluted air into clean air thanks to the generation of negative ions, which together with its 3 filters, work actively to optimally purify your home's air.
- It features 3 speeds: Low, Medium and High, in order to adapt operation to each household's requirements.
- The purifier features timer, and can be set for 1, 3, 7 or 15 hours in order to adapt it to each household's requirements.
- The Sleep mode allows purifying air while speed and dB are reduced to minimum, therefore it can be run during rest times.
- The touch control panel located on its front part allows setting manually different operating functions.
- Its small size makes it handy and easy to move from one room to another.
- The front side of the purifier, next to the touch panel, shows the speed and time settings thanks to the function LED light indicator.
- 25 W are enough to ensure a proper purifier operating and low energy consumption.
- The purifier emits only 55 dB, therefore its operating sound is low, even more when Sleep mode is set.

# TotalPure 1500 Connected

Air purifier with 100 CADR, 3 filtering layers, Wi-Fi control, PM 2,5 sensor and 40-m³ coverage area.

## FEATURES:

- Great CADR (Clean Air Delivery Rate), capable of filtering and cleaning 100 m³/h of the room's air.
- Its 3 filtering processes through the pre-filter, active carbon filter and high-efficiency filter minimise the amount of toxic or harmful particles present in air.
- Its ioniser is capable of transforming polluted air into clean air thanks to the generation of negative ions, which together with its 3 filters, work actively to optimally purify your home's air.
- Its Wi-Fi control through Smartphone allows setting different configurations of the purifier and checking the measured data.
- Its large coverage area of 40 m³ turns this purifier into the perfect tool to eliminate harmful particles contained in air and to clean your rooms' air.
- The purifier features a 2.5 PM sensor and a concentration sensor of polluting particles which are harmful to people, especially those that come from industrial emissions. Using the information obtained through this sensor, the purifier shows the air quality in a 3-colour scale, with blue being the higher quality and red the lower one.
- It includes 2 operating modes: Night mode, that minimises operating noise during sleep hours, and Auto mode, where the air purifier adapts its operation according to the detected air quality.
- The purifier has 2 speeds, Low and High, in order to adapt operation to each household's requirements.
- The front side of the purifier, next to the control buttons, shows the speed settings thanks to the function LED light indicator.
- 26 W are enough to ensure a proper purifier operating and low energy consumption.
- The purifier emits only 61 dB, therefore its operating sound is low, even more when Sleep mode is set.

# TotalPure 1400 Style

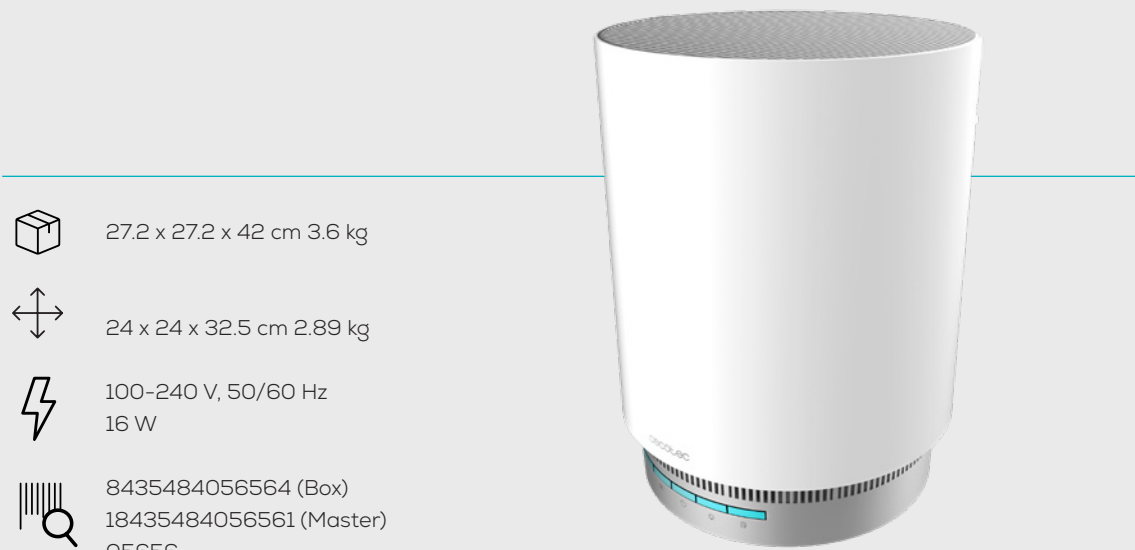

Air purifier with 130 CADR, 3 filtering phases (pre-filter, carbon filter and high-efficiency filter), 40 m3 coverage area, DC motor, 3 speeds with timer, Sleep mode and filter replacement reminder.

## FEATURES:

- Great CADR (Clean Air Delivery Rate), capable of filtering and cleaning up to 130 m3/h of the room's air in which it is placed.
- Its 3 filtering processes through the pre-filter, active carbon filter and high-efficiency filter minimise the amount of toxic or harmful particles present in air.
- Its large coverage area of up to 40 m3 turns this purifier into the perfect tool to remove harmful particles contained in air and to clean your rooms' air or a small living room.
- Its DC motor maximises efficiency during the purifying process while decreases electricity consumption and operation sound.
- It features 3 speeds: Low, Medium and High, in order to adapt operation to each household's requirements.
- The purifier features timer, and can be set for 2, 4 or 8 hours in order to adapt it to each household's requirements.
- The Sleep mode allows purifying air while speed and dB are reduced to minimum, therefore it can be run during rest times.
- When the filter is full of pre-filtered harmful and toxic particles, the "reset filter" icon will light up, indicating it must be replaced.

# TotalPure 2000 Connected

Air purifier with 160 CADR, triple filtering system with high-efficiency filter and Wi-Fi control.

## FEATURES:

- Great CADR (Clean Air Delivery Rate), capable of filtering and cleaning 160 m<sup>3</sup>/h of the room's air.
- Its 3 filtering processes through the pre-filter, active carbon filter and high-efficiency filter minimise the amount of toxic or harmful particles present in air.
- Its ioniser is capable of transforming polluted air into clean air thanks to the generation of negative ions, which together with its 3 filters, work actively to optimally purify your home's air.
- Its Wi-Fi control through Smartphone allows setting different configurations of the purifier and checking the measured data.
- Its large coverage area of 50 m<sup>3</sup> turns this purifier into the perfect tool to eliminate harmful particles contained in air and to clean your rooms' air.
- The purifier features a 2.5 PM sensor and a concentration sensor of polluting particles which are harmful to people, especially those that come from industrial emissions. Using the information obtained through this sensor, the purifier shows the air quality in a 3-colour scale, with blue being the higher quality and red the lower one.
- Smart control thanks to its top touch panel and its remote control, with which you can manage the purifier's operation.
- The purifier completely adapts to your needs with its 2 different speeds (Low and High) and its 2 operating modes: Night mode, which minimises operating noise during sleeping hours, and Auto mode, where the purifier operates accordingly with the air quality detected.
- The purifier features timer, and can be set for 1, 3, 7 or 15 hours in order to adapt it to each household's requirements.
- When the filter is full of pre-filtered harmful and toxic particles, the "reset filter" icon will light up, indicating it must be replaced.
- 50 W are enough to ensure a proper purifier operating and low energy consumption.
- The purifier emits only 62 dB, therefore its operating sound is low, even more when Sleep mode is set.

## COMPOSITION:

- Air purifier
- Remote control
- Instruction manual

# TotalPure 2500 Connected

Air purifier with 200 CADR, 65 m<sup>3</sup> coverage area, LED display and Wi-Fi control.

## FEATURES:

- Great CADR (Clean Air Delivery Rate), capable of filtering and cleaning 260 m<sup>3</sup>/h of the room's air.
- Its 3 filtering processes through the pre-filter, active carbon filter and high-efficiency filter minimise the amount of toxic or harmful particles present in air.
- Its Wi-Fi control through Smartphone allows setting different configurations of the purifier and checking the measured data.
- Its large coverage area of 65 m<sup>3</sup> turns this purifier into the perfect tool to eliminate harmful particles contained in air and to clean your rooms' air.
- The purifier features a 2.5 PM sensor and a concentration sensor of polluting particles which are harmful to people, especially those that come from industrial emissions.
- Using the information obtained through this sensor, the purifier shows the air quality in a 4-colour scale, with blue being the higher quality and red the lower one.
- Its LED display shows many data in real time, which allows observing how the concentration of harmful particles in the air you breathe decreases.
- The touch control panel located on its upper part allows setting manually different operating functions.
- The 4 speed settings of this purifier (Eco, Low, Medium and High) allow adapting it according to each situation's requirements.
- The purifier features timer, and can be set for 1, 4 or 8 hours in order to adapt it to each household's requirements.
- The Sleep mode allows purifying air while speed and dB are reduced to minimum, therefore it can be run during rest times.
- The Auto mode adapts the purifier's air according to the quality of air at each specific moment, and therefore according to the need to purify air.
- It has a built-in thermometer in order to measure temperature in real time, which is shown on the display.
- It also has a hygrometer, in order to show environmental humidity on the display.
- When the filter is full of pre-filtered harmful and toxic particles, the "reset filter" icon will light up, indicating it must be replaced.

# Discover the Total Pure 3in1 range

## TotalPure 3in1 Vision

3 in 1: Fan, heater and air purifier.

### FEATURES:

- This 3 in 1 has a great heating capacity due to its 2000 W, and is capable of heating rooms very efficiently.
- Thanks to its powerful fan, 45 W, it is also capable of cooling rooms very efficiently.
- It features an Air purifying function, which removes hazardous particles in air with its high-efficiency filter.
- It offers smart control thanks to its LED display and remote control, which allow for a more simple and easy use of this 3 in 1 device.
- Its DC motor and Bladeless technology ensure optimum operation of the device, and the best performance during heating, air purifying and fan function. Effective and silent.
- The 80° oscillation function aids the fan and heating operation as it widens the device's coverage area.
- It features a 8-hour timer, which allows setting the desired operating time. The LED display will show the selected settings.
- There a 14 speed settings in total. 9 speed settings under the Fan mode (1-Sleep, 9-Turbo), 4 speed settings under the Heating mode (Eco, Low, Medium and High), and a last Silent fan function. This function has its own remote control button.
- 3 preset modes: Sleep mode (minimum speed), Turbo mode (maximum speed) and Silent mode.
- Its LED display is located on its side touch control panel, and can be used to turn the device on and off, as to select Fan or Heating mode.
- Its thermostat allows the product to detect the room temperature, and selecting the desired temperature within a range of 1 °C to 30 °C (only heating mode).
- Elegant design which makes this 3 in 1 perfectly suitable for any room at home, for you to enjoy a warm or cool environment, always with the cleanest air.
